

ECM-TGU

11th Gen Intel® Tiger Lake U 3.5"Micro Module

User's Manual

4th Ed –27 July 2022

FCC Statement

THIS DEVICE COMPLIES WITH PART 15 FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS:

(1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE.

(2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION.

THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS "A" DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES.

THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND, IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS.

OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE IN WHICH CASE THE USER WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT HIS OWN EXPENSE.

Notice

This guide is designed for experienced users to setup the system within the shortest time. For detailed information, please always refer to the electronic user's manual.

Copyright Notice

Copyright © 2022, ALL RIGHTS RESERVED.

No part of this document may be reproduced, copied, translated, or transmitted in any form or by any means, electronic or mechanical, for any purpose, without the prior written permission of the original manufacturer.

Trademark Acknowledgement

Brand and product names are trademarks or registered trademarks of their respective owners.

Disclaimer

We reserve the right to make changes, without notice, to any product, including circuits and/or software described or contained in this manual in order to improve design and/or performance. We assume no responsibility or liability for the use of the described product(s), convey no license or title under any patent, copyright, or masks work rights to these products, and make no representations or warranties that

these products are free from patent, copyright, or mask work right infringement, unless otherwise specified. Applications that are described in this manual are for illustration purposes only. We make no representation or warranty that such application will be suitable for the specified use without further testing or modification.

Life Support Policy

OUR PRODUCTS ARE NOT FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE PRIOR WRITTEN APPROVAL OF US.

As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into body, or (b) support or sustain life and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in significant injury to the user.
2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

A Message to the Customer

Customer Services

Each and every product is built to the most exacting specifications to ensure reliable performance in the harsh and demanding conditions typical of industrial environments. Whether your new device is destined for the laboratory or the factory floor, you can be assured that your product will provide the reliability and ease of operation.

Your satisfaction is our primary concern. Here is a guide to our customer services. To ensure you get the full benefit of our services, please follow the instructions below carefully.

Technical Support

We want you to get the maximum performance from your products. So if you run into technical difficulties, we are here to help. For the most frequently asked questions, you can easily find answers in your product documentation. These answers are normally a lot more detailed than the ones we can give over the phone. So please consult the user's manual first.

ECM-TGU User's Manual

Product Warranty

We warrant to you, the original purchaser, that each of its products will be free from defects in materials and workmanship for two years from the date of purchase.

This warranty does not apply to any products which have been repaired or altered by persons other than repair personnel authorized by us, or which have been subject to misuse, abuse, accident or improper installation. We assume no liability under the terms of this warranty as a consequence of such events. Because of our high quality-control standards and rigorous testing, most of our customers never need to use our repair service. If any of products is defective, it will be repaired or replaced at no charge during the warranty period. For out-of-warranty repairs, you will be billed according to the cost of replacement materials, service time, and freight. Please consult your dealer for more details. If you think you have a defective product, follow these steps:

1. Collect all the information about the problem encountered. (For example, CPU type and speed, products model name, hardware & BIOS revision number, other hardware and software used, etc.) Note anything abnormal and list any on-screen messages you get when the problem occurs.
2. Call your dealer and describe the problem. Please have your manual, product, and any helpful information available.
3. If your product is diagnosed as defective, obtain an RMA (return material authorization) number from your dealer. This allows us to process your good return more quickly.
4. Carefully pack the defective product, a complete Repair and Replacement Order Card and a photocopy proof of purchase date (such as your sales receipt) in a shippable container. A product returned without proof of the purchase date is not eligible for warranty service.
5. Write the RMA number visibly on the outside of the package and ship it prepaid to your dealer.

1. Getting Started

1.1 Safety Precautions

Warning!

Always completely disconnect the power cord from your chassis whenever you work with the hardware. Do not make connections while the power is on. Sensitive electronic components can be damaged by sudden power surges. Only experienced electronics personnel should open the PC chassis.

Caution!

Always ground yourself to remove any static charge before touching the CPU card. Modern electronic devices are very sensitive to static electric charges. As a safety precaution, use a grounding wrist strap at all times. Place all electronic components in a static-dissipative surface or static-shielded bag when they are not in the chassis.

1.2 Packing List

Before you begin installing your single board, please make sure that the following materials have been shipped:

- 1 x 3.5" ECM-TGU Micro Module
- 1 x Serial ATA cable (7-pin, standard) 1 x Wire SATA power cable (15-pin, 4P/2.0mm) 1 x Flat Cable 9P(M)-PHD (10P/2.0mm)
- 1 x CPU Heatsink set
- 1 x M.2 Module bracket set

If any of the above items is damaged or missing, contact your retailer.

1.3 Document Amendment History

| Revision | Date | By | Comment |
|-----------------|------------|----|---|
| 1 st | April 2022 | | Initial Release |
| 2 nd | June 2022 | | Update 2.3 Setting Jumpers & Connectors |
| 3 rd | July 2022 | | Update 2.3 Setting Jumpers & Connectors |

1.4 Manual Objectives

This manual describes in details ECM-TGU Single Board.

We have tried to include as much information as possible but we have not duplicated information that is provided in the standard IBM Technical References, unless it proved to be necessary to aid in the understanding of this board.

We strongly recommend that you study this manual carefully before attempting to set up ECM-TGU or change the standard configurations. Whilst all the necessary information is available in this manual we would recommend that unless you are confident, you contact your supplier for guidance.

Please be aware that it is possible to create configurations within the CMOS RAM that make booting impossible. If this should happen, clear the CMOS settings, (see the description of the Jumper Settings for details).

If you have any suggestions or find any errors regarding this manual and want to inform us of these, please contact our Customer Service department with the relevant details.

1.5 System Specifications

| System | |
|--------------------|---|
| CPU | Onboard Tiger Lake U Gen 11th Intel® Core™ SoC i7/i5/i3 & Celeron®BGA Processor |
| BIOS | AMI uEFI BIOS, 256Mbit SPI Flash ROM |
| I/O Chip | ITE IT8528E |
| System Memory | One 260-pin DDR4 3200MHz SO-DIMM socket, supports up to 32GB Max (non ECC only.) |
| Watchdog Timer | H/W Reset, 1sec. – 65535sec./min.1sec. or 1min. step |
| H/W Status Monitor | CPU temperature monitoring Voltages monitoring CPU fan speed control |
| TPM | Onboard NuvoTon NPCT754AADYX support TPM 2.0 |
| iAMT | Core i SKU CPU support iAMT Celeron SKU CPU no support iAMT |
| Expansion Slot | |
| M.2 | 1 x M.2 Key M support 2242 (with 1 x PCI-e Gen4 x4 signal), standard package with 60 to 42 bracket + screw set 1 x M.2 Key B 3042/2242 (with PCIe x1, SATA and USB2.0 signal, with 1 x SIM card slot) standard package with 52 to 42 bracket + screw set. Support 4G, no 5G (no USB3 signal). 1 x M.2 Key E 2230 support WiFi module (1 x PCI-e x 1 & USB 2.0 Signal) |
| Storage | |
| M.2 | 1 x M.2 Key M support 2242 (with 1 x PCI-e Gen4 x4 signal), standard package with 60 to 42 bracket + screw set 1 x M.2 Key B 3042/2242 (with PCIe x1, SATA and USB2.0 signal, with 1 x SIM card slot) standard package with 52 to 42 bracket + screw set |
| SATA | 1 x SATA III |
| Edge I/O | |
| LAN | 1 x Intel® I225LM/I225IT 2.5 Gigabit Ethernet 2 x Intel® I210AT/I210IT Gigabit Ethernet |
| USB 3.1 | 4 x USB 3.2 Gen 2 x1 |
| DP | 2x DP++ |
| Audio | Support Line-out & Mic-in & audio by 2 in 1 Jack |
| DC Input | 1 x 2 x 2 pin, pitch 4.20mm connector for power input connector |
| LED Indicator | Power LED /HDD LED at IO |
| Onboard I/O | |

User condition suggestion:

1. Tempo Semiconductor 92HD73C1T5 Audio Codec, MIC-IN OS default setting Microphone: 86 / Microphone Boost : +10%, different Microphone may have sound reception vary leading noise, customer can manually turn off boost.
2. It is required for 8K resolution by using 2 x DP simultaneously. Limitation: Black screen will be shown if close LVDS function in BIOS when using 2 x DP, with debug card code: Ad. User needs to connect one DP to OS, then connect the second DP.
3. When remove device M.2 KeyE (Intel® Wireless-AC 9560) from ECM-TGU motherboard, OS Device Manager will still show this on device item with exclamation mark ! (Code 10). It has to power off DC-In and reboot. (With system product, please request dedicated AE for OEM BIOS to enable, or customer can Enable from BIOS menu)
4. N_SIM1 and J_N_SIM1 can't be using at the same time, user can choose either one.

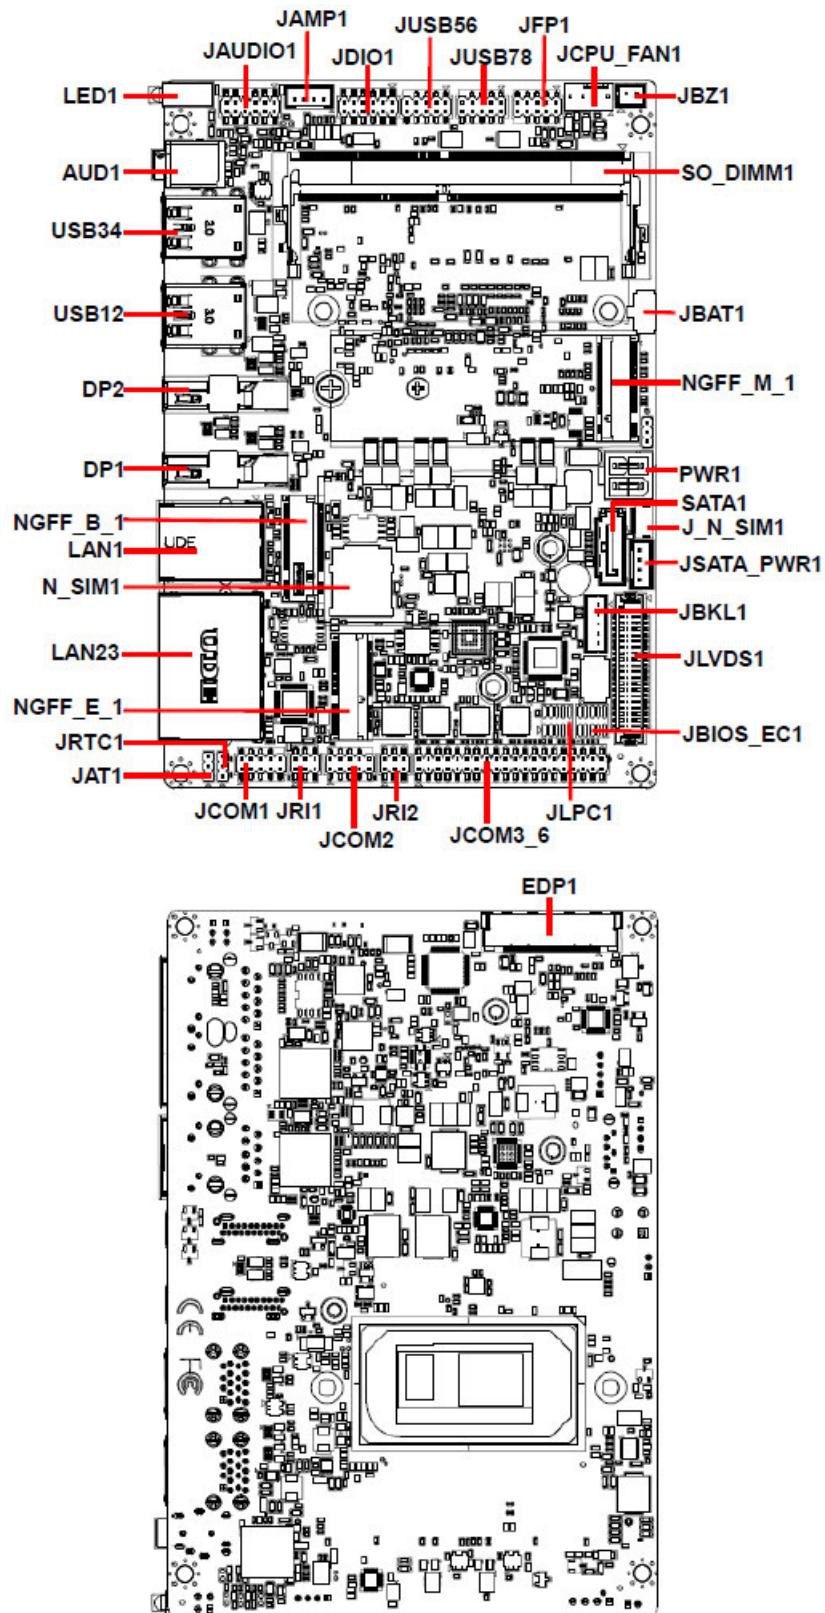

1.6 Architecture Overview—Block Diagram

The following block diagram shows the architecture and main components of ECM-TGU

2. Hardware Configuration

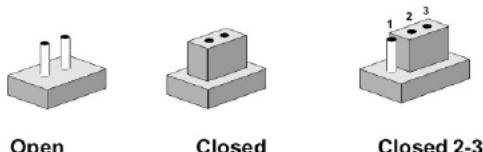

2.1 Product Overview

2.2 Jumper and Connector List

You can configure your board to match the needs of your application by setting jumpers. A jumper is the simplest kind of electric switch.

It consists of two metal pins and a small metal clip (often protected by a plastic cover) that slides over the pins to connect them. To “close” a jumper you connect the pins with the clip. To “open” a jumper you remove the clip. Sometimes a jumper will have three pins, labeled 1, 2, and 3. In this case, you would connect either two pins.

The jumper settings are schematically depicted in this manual as follows:

A pair of needle-nose pliers may be helpful when working with jumpers.

Connectors on the board are linked to external devices such as hard disk drives, a keyboard, or floppy drives. In addition, the board has a number of jumpers that allow you to configure your system to suit your application.

If you have any doubts about the best hardware configuration for your application, contact your local distributor or sales representative before you make any changes.

The following tables list the function of each of the board's jumpers and connectors.

Jumpers

| Label | Function | Note |
|--------|------------------------------------|----------------------------|
| JRI1/2 | Serial port 1/2 pin9 signal select | 3 x 2 header, pitch 2.00mm |
| JAT1 | AT/ATX Input power select | 3 x 1 header, pitch 2.00mm |
| JRTC1 | Clear CMOS | 3 x 1 header, pitch 2.00mm |

Connectors

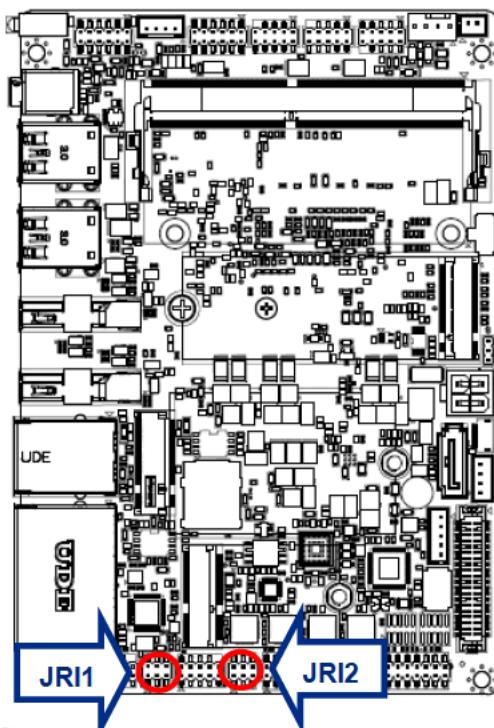

| Label | Function | Note |
|-----------|----------------------------------|--|
| JKL1 | LCD inverter backlight connector | 5 x 1 wafer, pitch 2.00mm Matching Connector: JST PHR-5 |

3.BIOS Setup

3.1 Introduction

The BIOS setup program allows users to modify the basic system configuration. In this following chapter will describe how to access the BIOS setup program and the configuration options that may be changed.

3.2 Starting Setup

AMI BIOS™ is immediately activated when you first power on the computer. The BIOS reads the system information contained in the NVRAM and begins the process of checking out the system and configuring it. When it finishes, the BIOS will seek an operating system on one of the disks and then launch and turn control over to the operating system.

While the BIOS is in control, the Setup program can be activated in one of two ways:

By pressing <ESC> or immediately after switching the system on, or

By pressing the < ESC> or key when the following message appears briefly at the left-top of the screen during the POST (Power On Self Test).

Press <ESC> or to enter SETUP

If the message disappears before you respond and you still wish to enter Setup, restart the system to try again by turning it OFF then ON or pressing the "RESET" button on the system case. You may also restart by simultaneously pressing <Ctrl>, <Alt>, and <Delete> keys.

3.3 Using Setup

In general, you use the arrow keys to highlight items, press <Enter> to select, use the PageUp and PageDown keys to change entries, press <F1> for help and press <Esc> to quit. The following table provides more detail about how to navigate in the Setup program using the keyboard.

| Button | Description |
|---------|---|
| ↑ | Move to previous item |
| ↓ | Move to next item |
| ← | Move to the item in the left hand |
| → | Move to the item in the right hand |
| Esc key | Main Menu -- Quit and not save changes into NVRAM Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu |
| + key | Increase the numeric value or make changes |
| - key | Decrease the numeric value or make changes |
| F1 key | General help, only for Status Page Setup Menu and Option Page Setup Menu |
| F2 key | Previous Values |
| F3 key | Optimized defaults |
| F4 key | Save & Exit Setup |

- **Navigating Through The Menu Bar**

Use the left and right arrow keys to choose the menu you want to be in.

Note: Some of the navigation keys differ from one screen to another.

- **To Display a Sub Menu**

Use the arrow keys to move the cursor to the sub menu you want. Then press <Enter>. A “➤” pointer marks all sub menus.

3.4 Getting Help

Press F1 to pop up a small help window that describes the appropriate keys to use and the possible selections for the highlighted item. To exit the Help Window press <Esc> or the <Enter> key again.

3.5 In Case of Problems

If, after making and saving system changes with Setup, you discover that your computer no longer is able to boot, the AMI BIOS supports an override to the NVRAM settings which resets your system to its defaults.

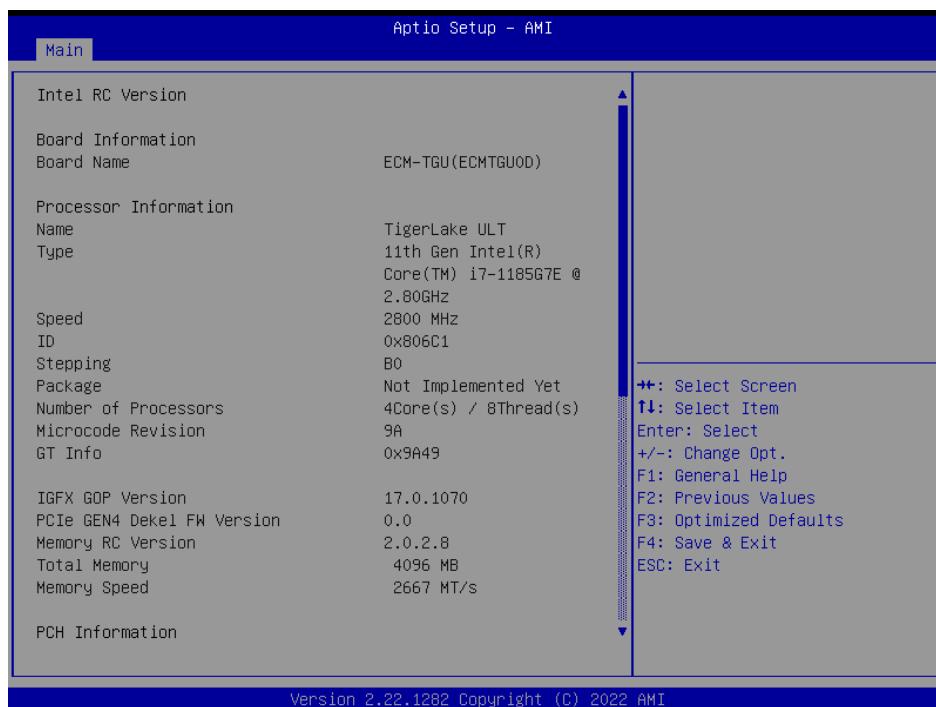

The best advice is to only alter settings which you thoroughly understand. To this end, we strongly recommend that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both BIOS Vendor and your systems manufacturer to provide the absolute maximum performance and reliability. Even a seemingly small change to the chipset setup has the potential for causing you to use the override.

3.6 BIOS setup

Once you enter the Aptio Setup Utility, the Main Menu will appear on the screen. The Main Menu allows you to select from several setup functions and exit choices. Use the arrow keys to select among the items and press <Enter> to accept and enter the sub-menu.

3.6.1 Main Menu

This section allows you to record some basic hardware configurations in your computer and set the system clock.

3.6.1.1 System Language

This option allows choosing the system default language.

3.6.1.2 System Date

Use the system date option to set the system date. Manually enter the day, month and year.

3.6.1.3 System Time

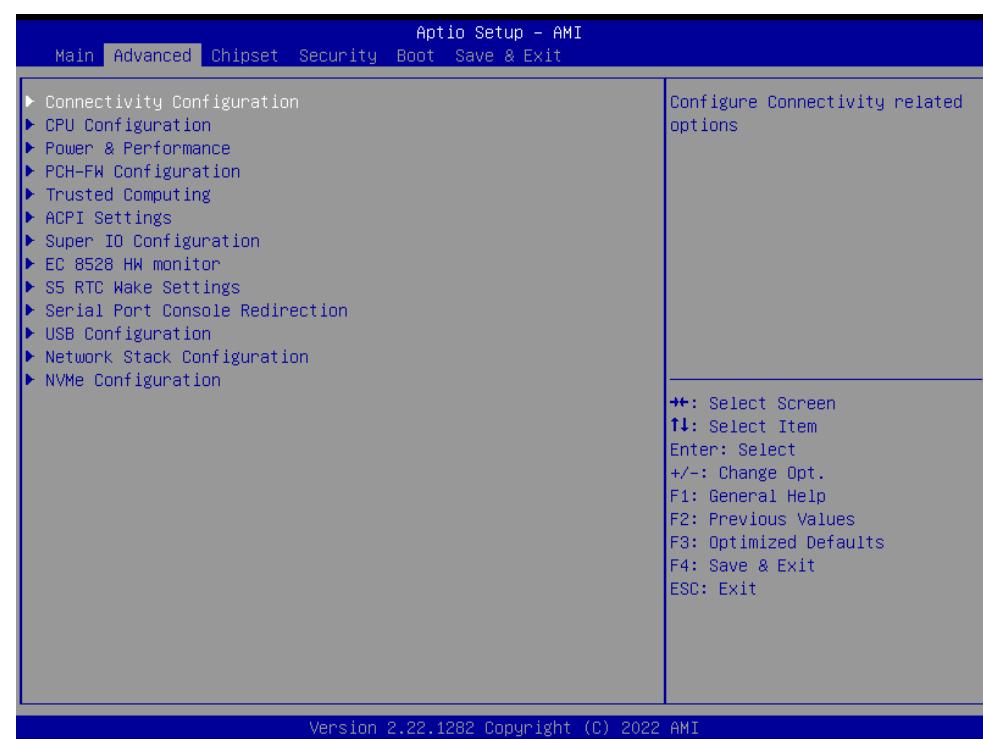

Use the system time option to set the system time. Manually enter the hours, minutes and seconds.

Note: The BIOS setup screens shown in this chapter are for reference purposes only, and may not exactly match what you see on your screen.

3.6.2 Advanced Menu

This section allows you to configure your CPU and other system devices for basic operation through the following sub-menus.

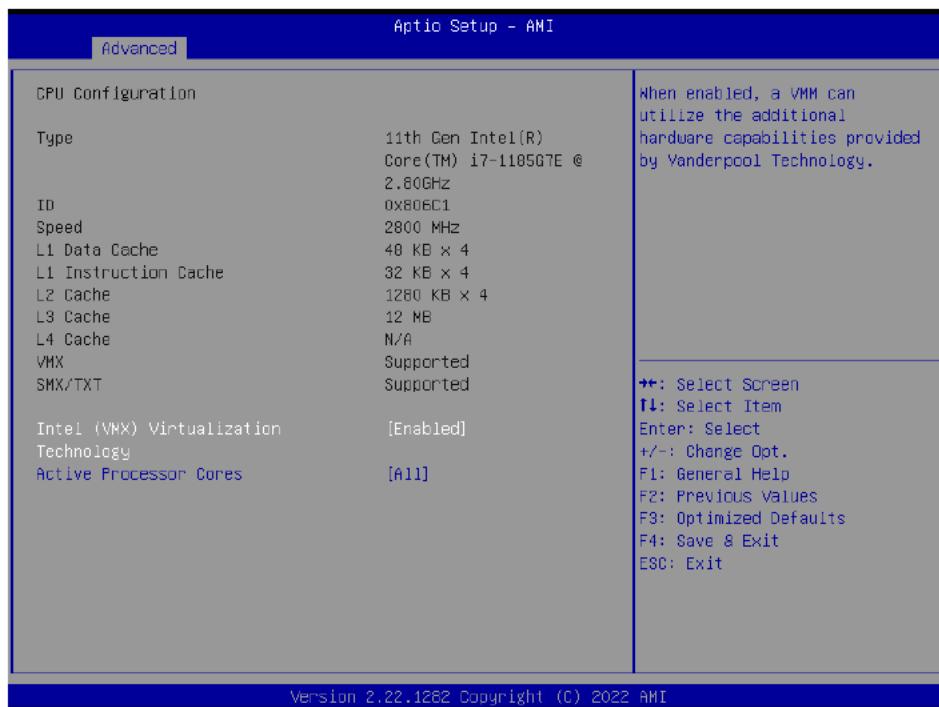

3.6.2.1 Connectivity Configuration

| Item | Options | Description |
|-----------|---|--|
| CNVi Mode | Disable Integrated Auto Detection[Default] | This option configures Connectivity. [Auto Detection] means that if Discrete solution is discovered it will be enabled by default. Otherwise Integrated solution (CNVi) will be enabled; [Disable Integrated] disables Integrated Solution. NOTE: When CNVi is present, the GPIO pins that are used for radio. |

3.6.2.2 CPU Configuration

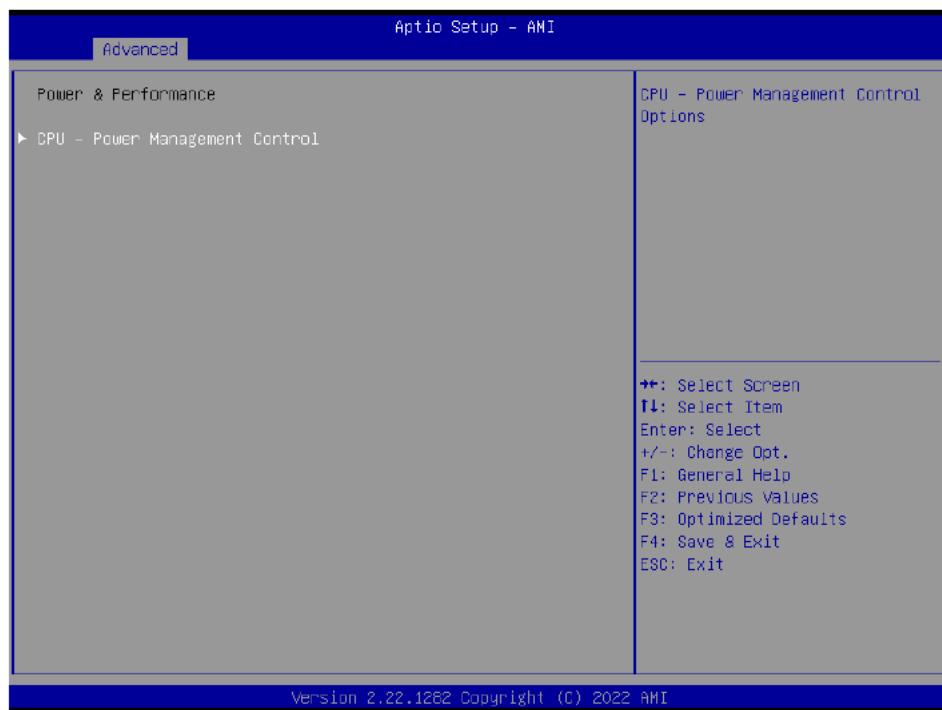

Use the CPU configuration menu to view detailed CPU specification and configure the CPU.

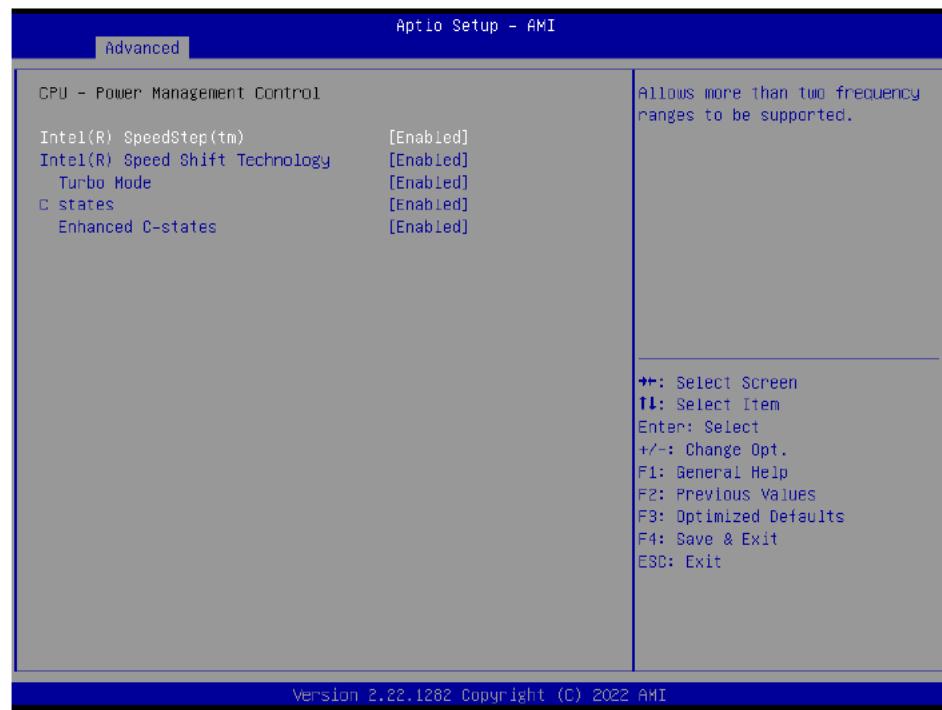

| Item | Options | Description |
|--|--|---|
| Intel (VMX) Virtualization Technology | Disabled Enabled[Default] | When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology. |
| Active Processor Cores | All[Default] 1 2 3 4 5 6 7 8 | Number of cores to enable in each processor package. |

ECM-TGU User's Manual

3.6.2.3 Power & Performance

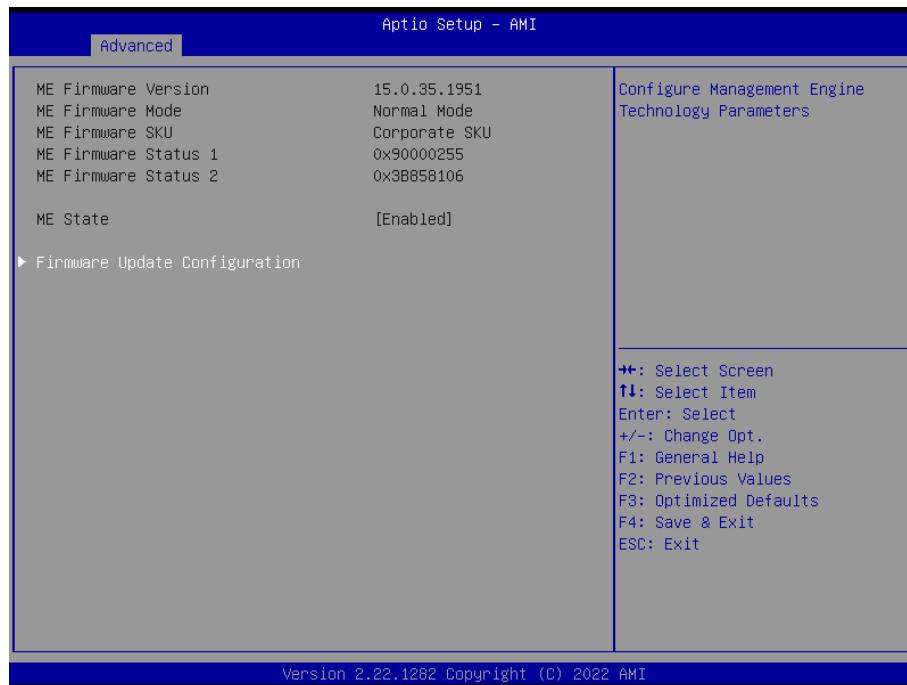

3.6.2.3.1 CPU – Power Management Control

| Item | Option | Description |
|-------------------------------|-------------------------------|---|
| Intel® SpeedStep™ | Enabled[Default], Disabled | Allows more than two frequency ranges to be supported. |
| Intel® Speed Shift Technology | Enabled[Default], Disabled | Enable/Disable Intel® Speed Shift Technology support. Enabling will expose the CPPC v2 interface to allow for hardware controlled P-states. |

| | | |
|--------------------------|--|---|
| Turbo Mode | Enabled[Default], Disabled | Enable/Disable processor Turbo Mode (requires Intel Speed Step or Intel Speed Shift to be available and enabled). |
| C States | Enabled[Default], Disabled | Enable/Disable CPU Power Management. |
| Enhanced C-States | Enabled[Default], Disabled | Enable/Disable C1E. When enabled, CPU will switch to minimum speed when all cores enter C-State. |

3.6.2.4 PCH-FW Configuration

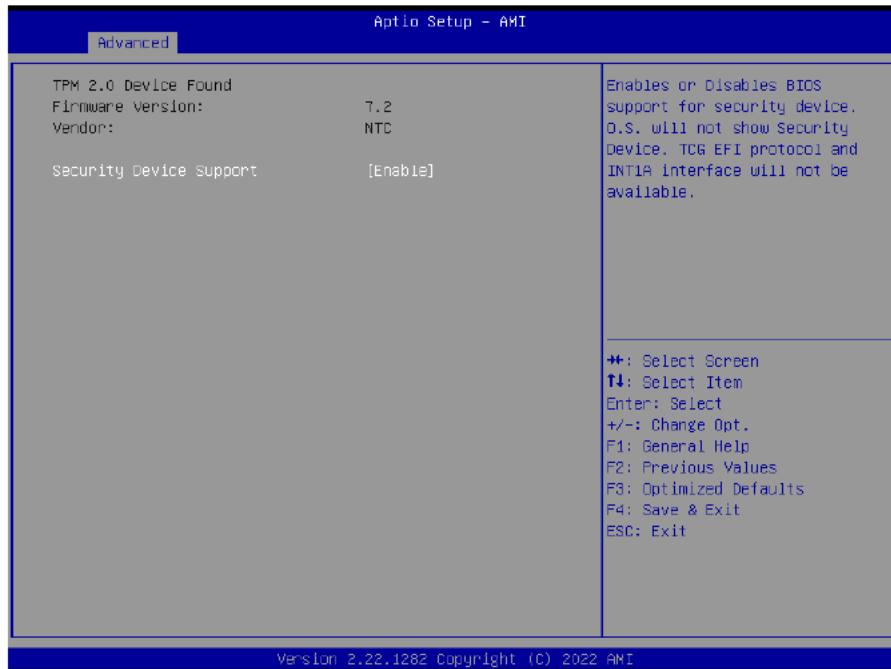

3.6.2.4.1 Firmware Update Configuration

ECM-TGU User's Manual

| Item | Option | Description |
|----------------------|----------------------------|---|
| ME FW Image Re-Flash | Disabled[Default], Enabled | Enable/Disable Me FW Image Re-Flash function. |

3.6.2.5 Trusted Computing

| Item | Options | Description |
|-------------------------|--------------------------|---|
| Security Device Support | Disable, Enable[Default] | Enables or Disables BIOS support for security device. O.S. will not show Security Device. TCG EFI protocol and INT1A interface will not be available. |

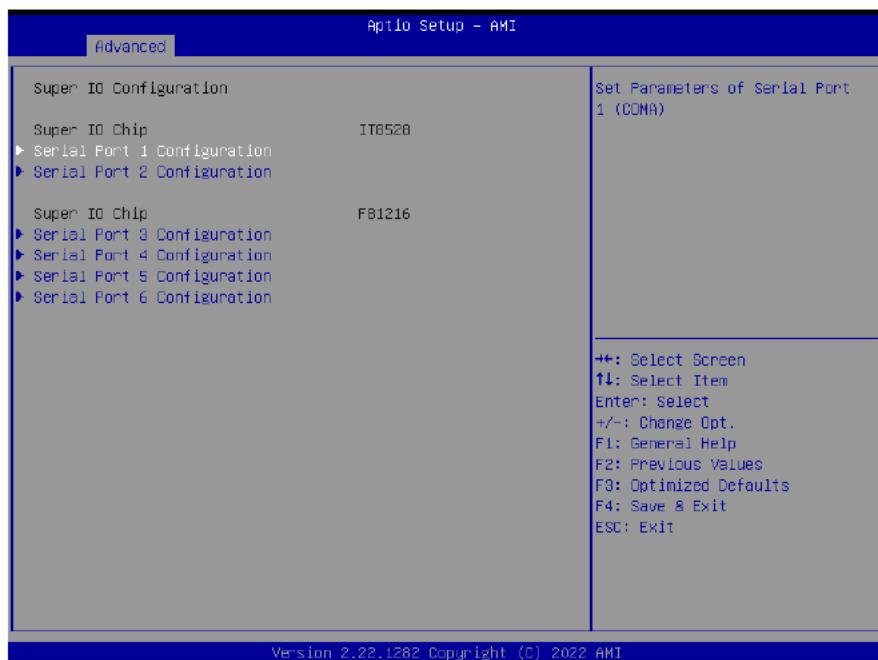

3.6.2.6 ACPI Settings

| Item | Options | Description |
|---------------------------|---|---|
| Enable Hibernation | Disabled Enabled[Default], | Enables or Disables System ability to Hibernate (OS/S4 Sleep State). This option may not be effective with some OS. |
| ACPI Sleep State | Suspend Disabled, S3 (Suspend to RAM)[Default] | Select the highest ACPI sleep state the system will enter when the SUSPEND button is pressed. |

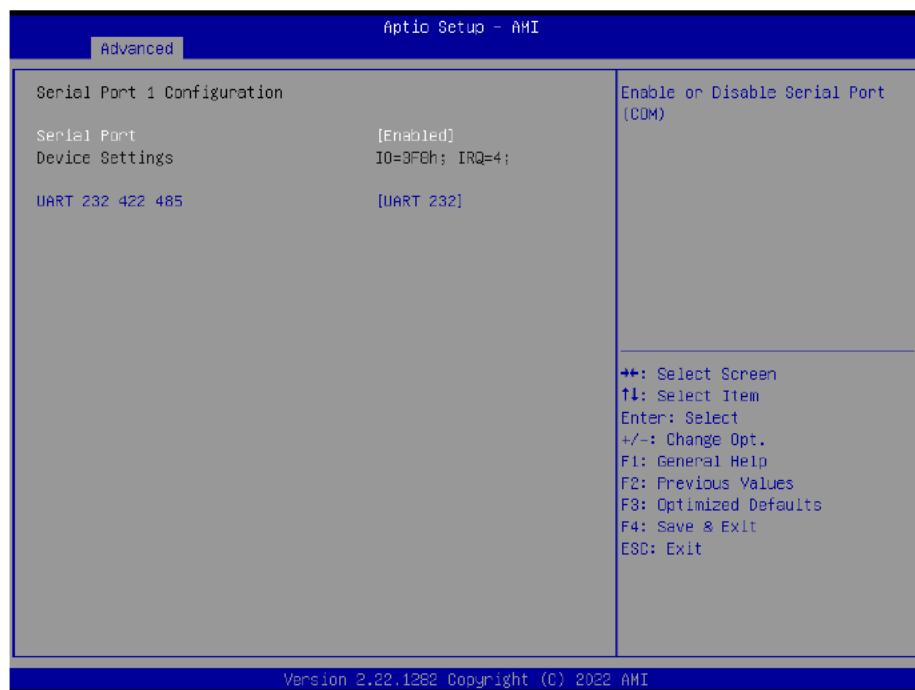

3.6.2.7 Super IO Configuration

You can use this item to set up or change the Super IO configuration for serial ports. Please refer to 3.6.2.7.1 ~ 3.6.2.7.6 for more information.

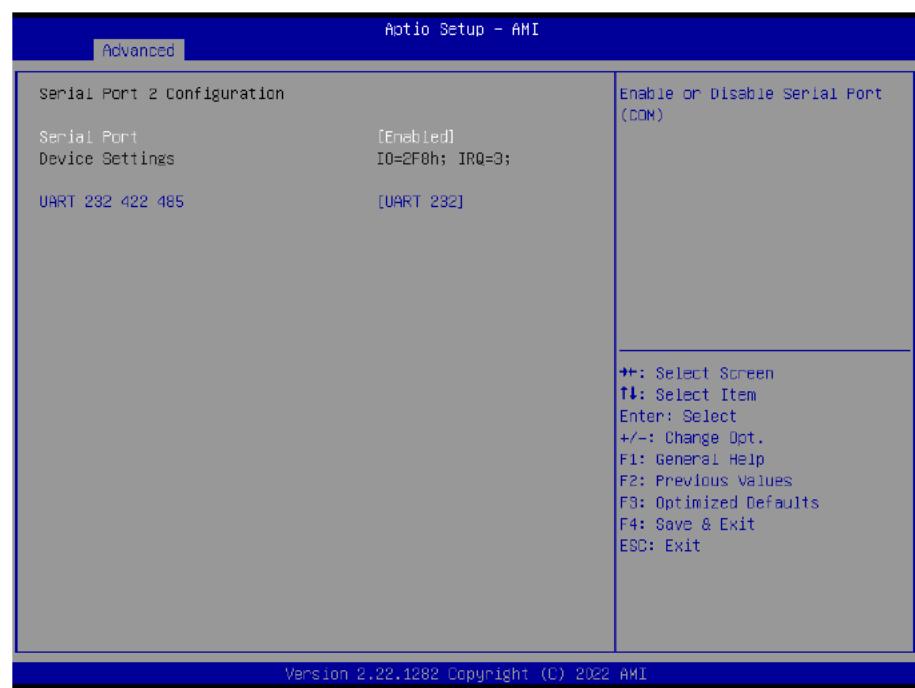

| Item | Description |
|------------------------------------|---|
| Serial Port 1 Configuration | Set Parameters of Serial Port 1 (COMA). |
| Serial Port 2 Configuration | Set Parameters of Serial Port 2 (COMB). |
| Serial Port 3 Configuration | Set Parameters of Serial Port 3 (COMC). |
| Serial Port 4 Configuration | Set Parameters of Serial Port 4 (COMD). |
| Serial Port 5 Configuration | Set Parameters of Serial Port 5 (COME). |
| Serial Port 6 Configuration | Set Parameters of Serial Port 6 (COMF). |

3.6.2.7.1 Serial Port 1 Configuration

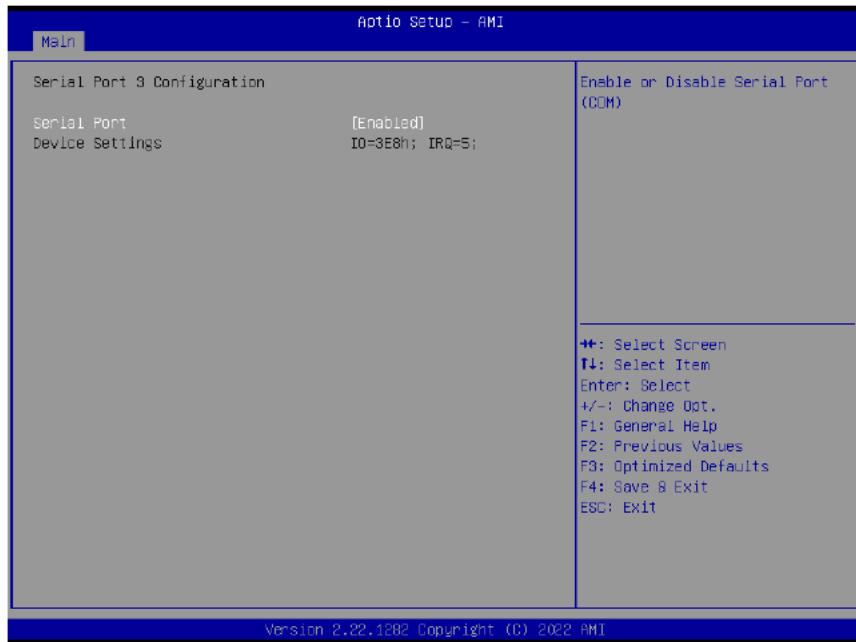

| Item | Option | Description |
|-------------------------|---|--|
| Serial Port | Enabled[Default], Disabled | Enable or Disable Serial Port (COM). |
| UART 232 422 485 | UART 232[Default] UART 422 UART 485 | Change the Serial Port as RS232/422/485. |

3.6.2.7.2 Serial Port 2 Configuration

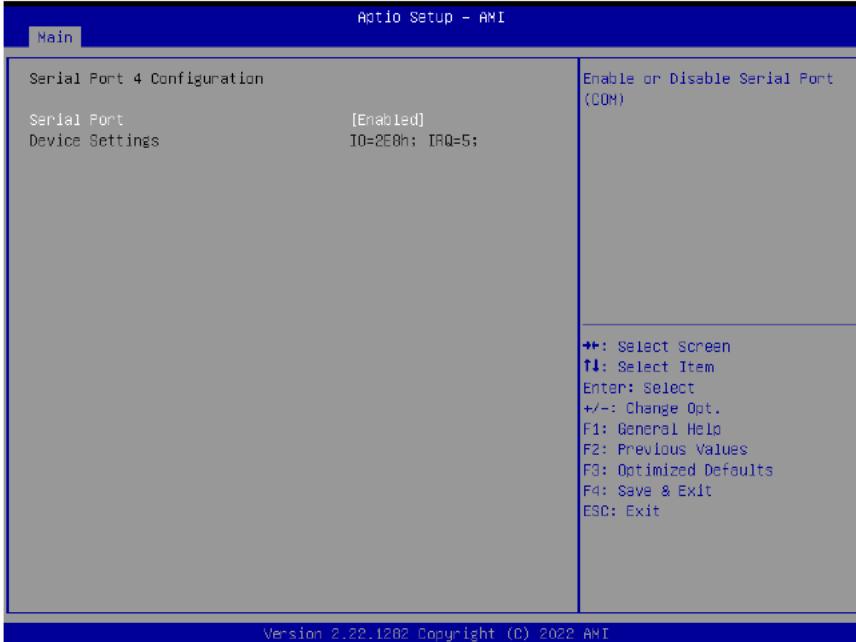

| Item | Option | Description |
|------------------|---|--|
| Serial Port | Enabled[Default], Disabled | Enable or Disable Serial Port (COM). |
| UART 232 422 485 | UART 232[Default] UART 422 UART 485 | Change the Serial Port as RS232/422/485. |

3.6.2.7.3 Serial Port 3 Configuration

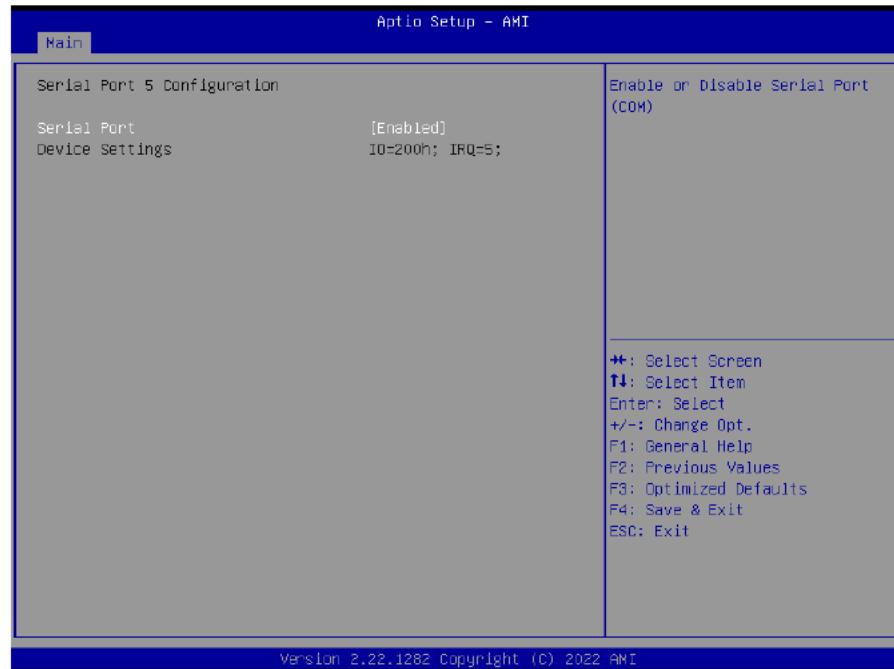

| Item | Option | Description |
|-------------|-------------------------------|--------------------------------------|
| Serial Port | Enabled[Default], Disabled | Enable or Disable Serial Port (COM). |

3.6.2.7.4 Serial Port 4 Configuration

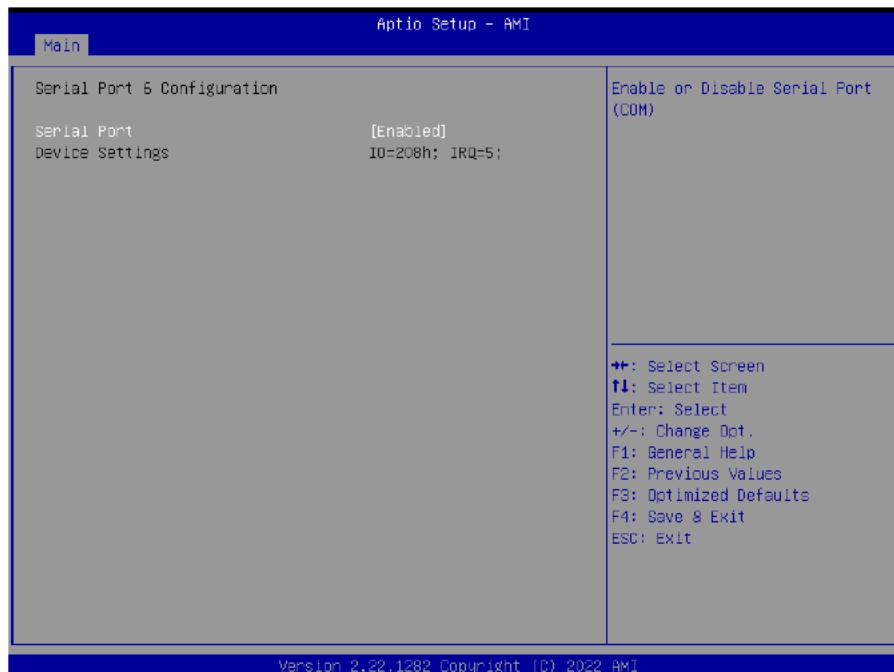

| Item | Option | Description |
|-------------|-------------------------------|--------------------------------------|
| Serial Port | Enabled[Default], Disabled | Enable or Disable Serial Port (COM). |

3.6.2.7.5 Serial Port 5 Configuration

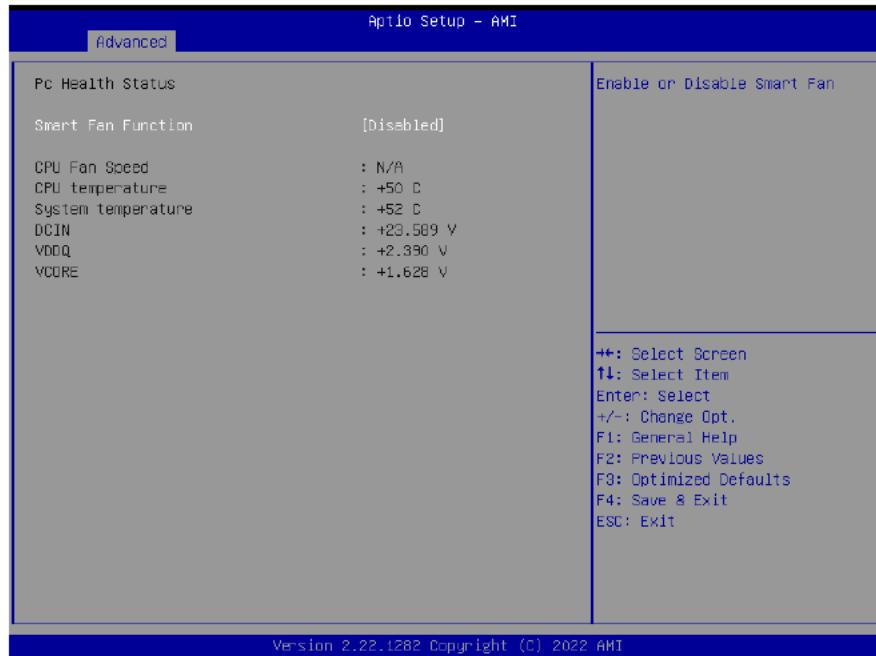

| Item | Option | Description |
|-------------|-------------------------------|--------------------------------------|
| Serial Port | Enabled[Default], Disabled | Enable or Disable Serial Port (COM). |

3.6.2.7.6 Serial Port 6 Configuration

| Item | Option | Description |
|-------------|-------------------------------|--------------------------------------|
| Serial Port | Enabled[Default], Disabled | Enable or Disable Serial Port (COM). |

3.6.2.8 HW Monitor

| Item | Options | Description |
|--------------------|-------------------------------|--------------------------------|
| Smart Fan Function | Enabled, Disabled[Default] | Enables or Disables Smart Fan. |

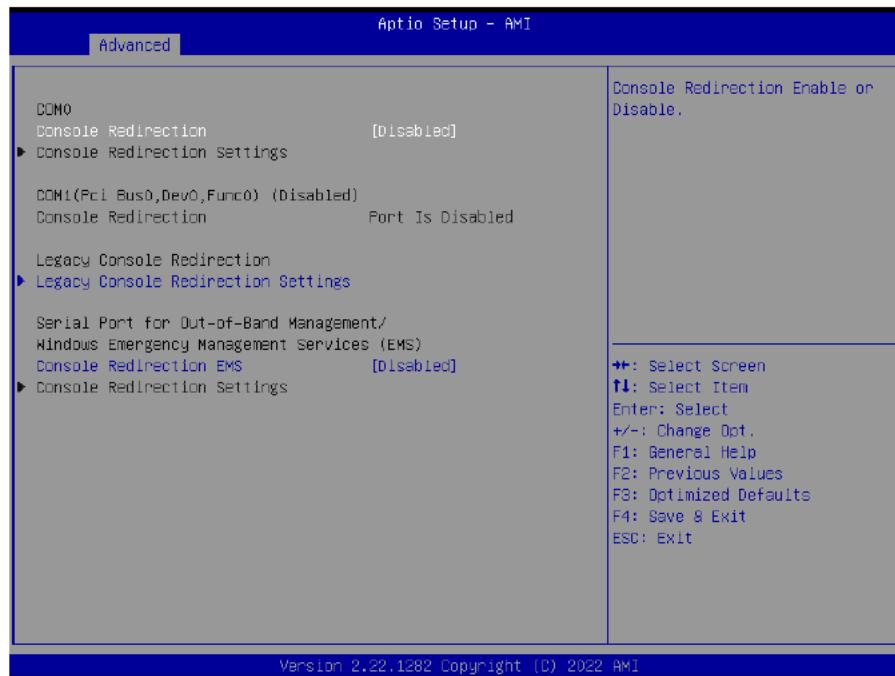

3.6.2.9 S5 RTC Wake Settings

ECM-TGU User's Manual

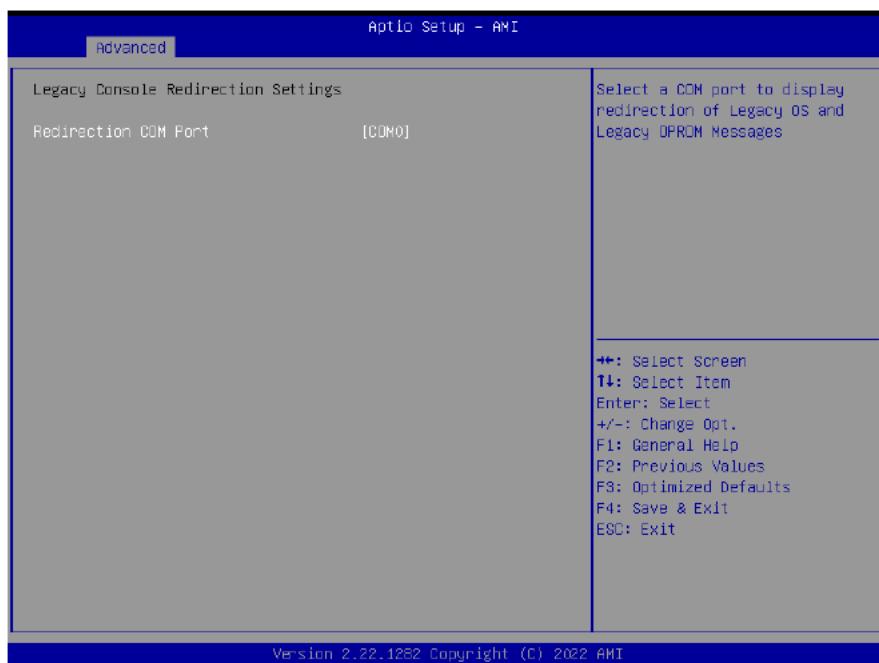

| Item | Options | Description |
|---------------------|---|--|
| Wake system from S5 | Disabled[Default], Fixed Time Dynamic Time | Enable or disable System wake on alarm event. Select Fixed Time, system will wake on the hr::min::sec specified. Select Dynamic Time, System will wake on the current time + Increase minute(s). |

3.6.2.10 Serial Port Console Redirection

| Item | Options | Description |
|-------------------------|--|--|
| Console Redirection | Disabled[Default], Enabled | Console Redirection Enable or Disable. |
| Console Redirection EMS | Disabled[Default], Enabled | Console Redirection Enable or Disable. |

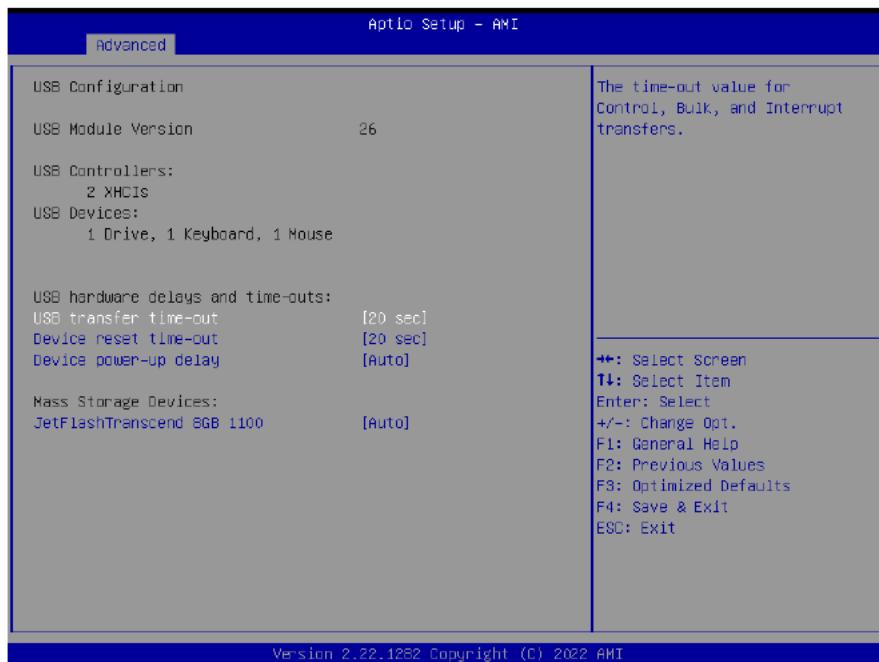

3.6.2.10.1 Legacy Console Redirection Settings

| Item | Option | Description |
|-----------------------------|---------------|--|
| Redirection COM Port | COM0[Default] | Select a COM port to display redirection of Legacy OS and Legacy OPROM Messages. |

3.6.2.11 USB Configuration

The USB Configuration menu helps read USB information and configures USB settings.

| Item | Options | Description |
|------------------------------|----------------|--|
| USB transfer time-out | 1 sec 5 sec | The time-out value for Control, Bulk, and Interrupt transfers. |

ECM-TGU User's Manual

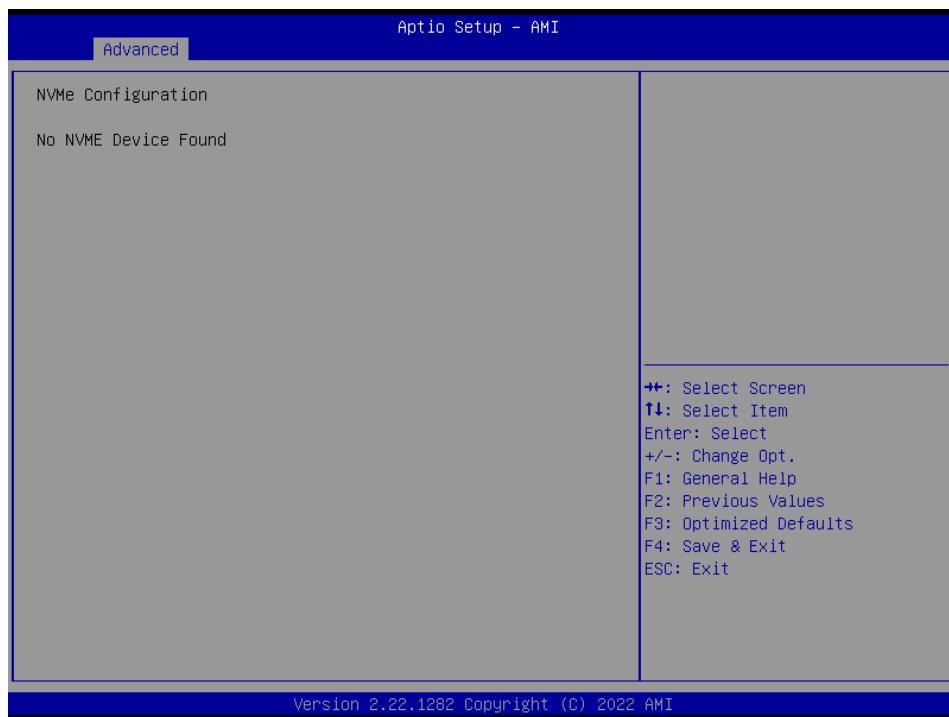

| | | |
|------------------------------|--|--|
| | 10 sec 20 sec [Default] | |
| Device reset time-out | 10 sec 20 sec [Default] 30 sec 40 sec | USB mass storage device Start Unit command time-out. |
| Device power-up delay | Auto [Default] Manual | Maximum time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100ms, for a Hub port the delay is taken from Hub descriptor. |
| Mass Storage Devices | Auto [Default] Floppy Forced FDD Hard Disk CD-ROM | Mass storage device emulation type. 'AUTO' enumerates devices according to their media format. Optical drives are emulated as 'CDROM', drives with no media will be emulated according to a drive type. |

3.6.2.12 Network Stack Configuration

| Item | Options | Description |
|----------------------|-------------------------------------|------------------------------------|
| Network Stack | Enabled Disabled[Default] | Enable/Disable UEFI Network Stack. |

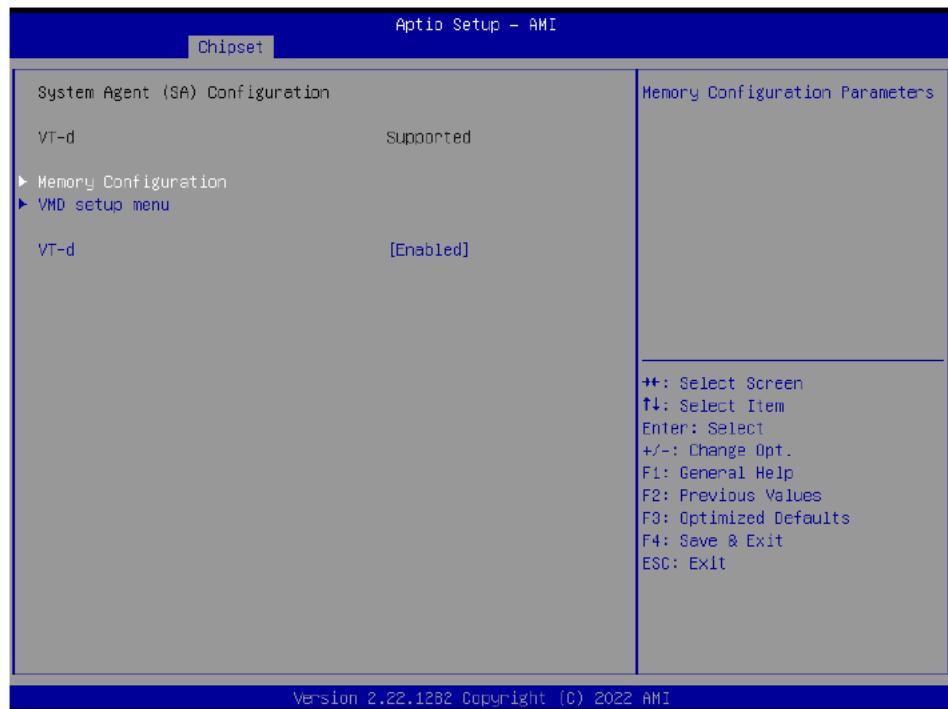

3.6.2.13 NVMe Configuration

3.6.3 Chipset

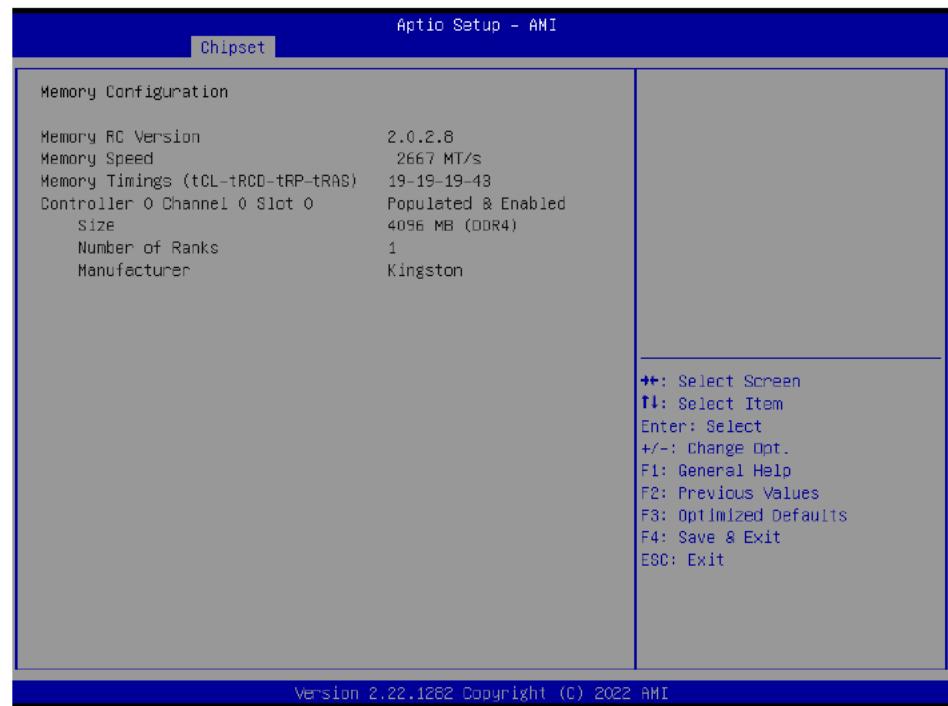

3.6.3.1 System Agent (SA) Configuration

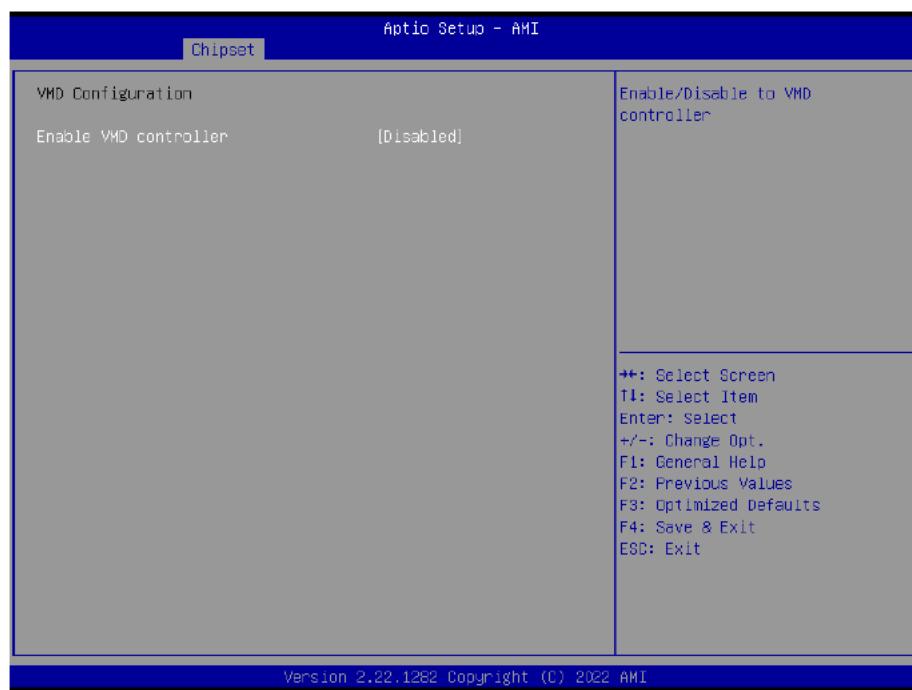

| Item | Option | Description |
|------|------------------------------|------------------|
| VT-d | Enabled[Default] Disabled | VT-d capability. |

3.6.3.1.1 Memory Configuration

3.6.3.1.2 VMD setup menu Graphics Configuration

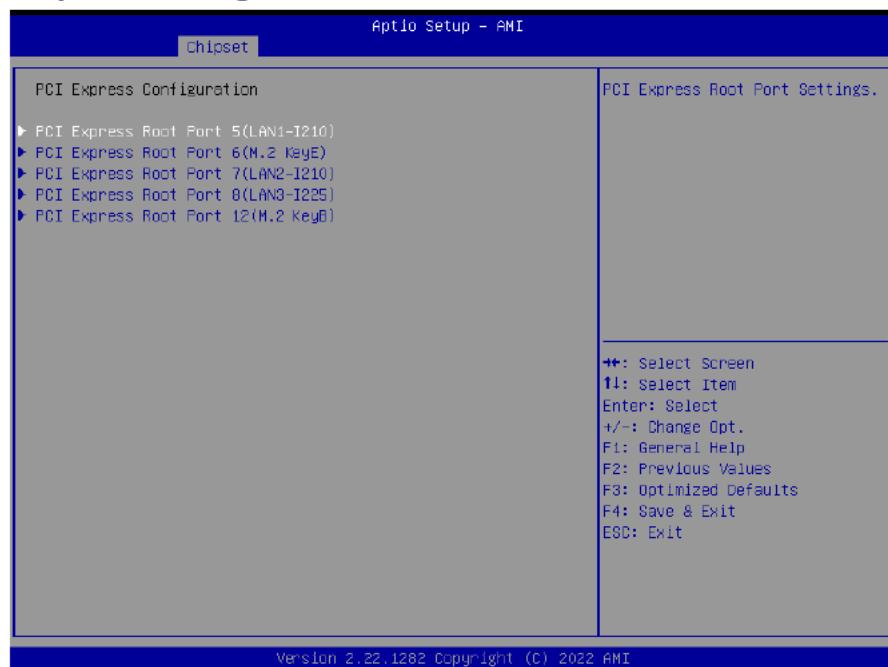

| Item | Option | Description |
|------------------------------|--------------------------------------|--------------------------------|
| Enable VMD controller | Enabled Disabled [Default] | Enable/Disable VMD controller. |

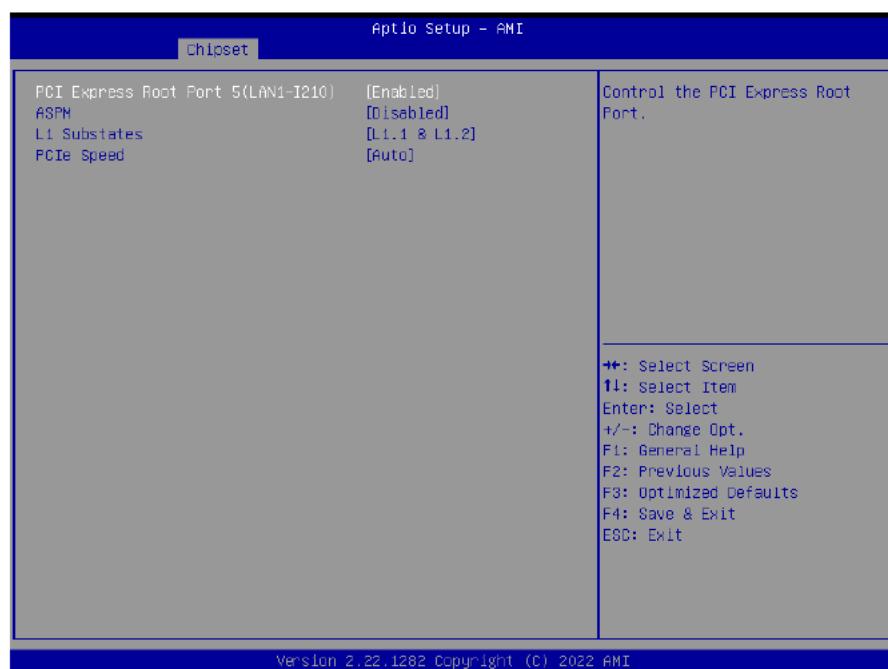

3.6.3.2 PCH-IO Configuration

3.6.3.2.1 PCI Express Configuration

3.6.3.2.1.1 PCI Express Root Port 5(LAN1-I210)

| Item | Option | Description |
|---|---|--|
| PCI Express Root Port 5(LAN1-I210) | Enabled[Default], Disabled | Control the PCI Express Root Port. |
| ASPM | Disabled[Default], L0s L1 L0sL1 Auto | Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM. |

| | | |
|---------------------|---|------------------------------------|
| L1 Substates | Disabled, L1.1 L1.1 & L1.2[Default] | PCI Express L1 Substates settings. |
| PCIe Speed | Auto[Default] Gen1 Gen2 Gen3 | Configure PCIe Speed. |

3.6.3.2.1.2 PCI Express Root Port 6(M.2 KeyE)

| Item | Option | Description |
|--|--|--|
| PCI Express Root Port 6(M.2 KeyE) | Enabled[Default], Disabled | Control the PCI Express Root Port. |
| ASPM | Disabled[Default], L0s L1 L0sL1 Auto | Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM. |
| L1 Substates | Disabled, L1.1 L1.1 & L1.2[Default] | PCI Express L1 Substates settings. |
| PCIe Speed | Auto[Default] Gen1 Gen2 Gen3 | Configure PCIe Speed. |

3.6.3.2.1.3 PCI Express Root Port 7(LAN2-I210)

| Item | Option | Description |
|---|--|--|
| PCI Express Root Port 7(LAN2-I210) | Enabled[Default], Disabled | Control the PCI Express Root Port. |
| ASPM | Disabled[Default], L0s L1 L0sL1 Auto | Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM. |
| L1 Substates | Disabled, L1.1 L1.1 & L1.2[Default] | PCI Express L1 Substates settings. |
| PCIe Speed | Auto[Default] Gen1 Gen2 Gen3 | Configure PCIe Speed. |

3.6.3.2.1.4 PCI Express Root Port 8(LAN3-I225)

| Item | Option | Description |
|---|--|--|
| PCI Express Root Port 8(LAN3-I225) | Enabled[Default], Disabled | Control the PCI Express Root Port. |
| ASPM | Disabled[Default], L0s L1 L0sL1 Auto | Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM. |
| L1 Substates | Disabled, L1.1 L1.1 & L1.2[Default] | PCI Express L1 Substates settings. |
| PCIE Speed | Auto[Default] Gen1 Gen2 Gen3 | Configure PCIE Speed. |

3.6.3.2.1.5 PCI Express Root Port 12(M.2 KeyB)

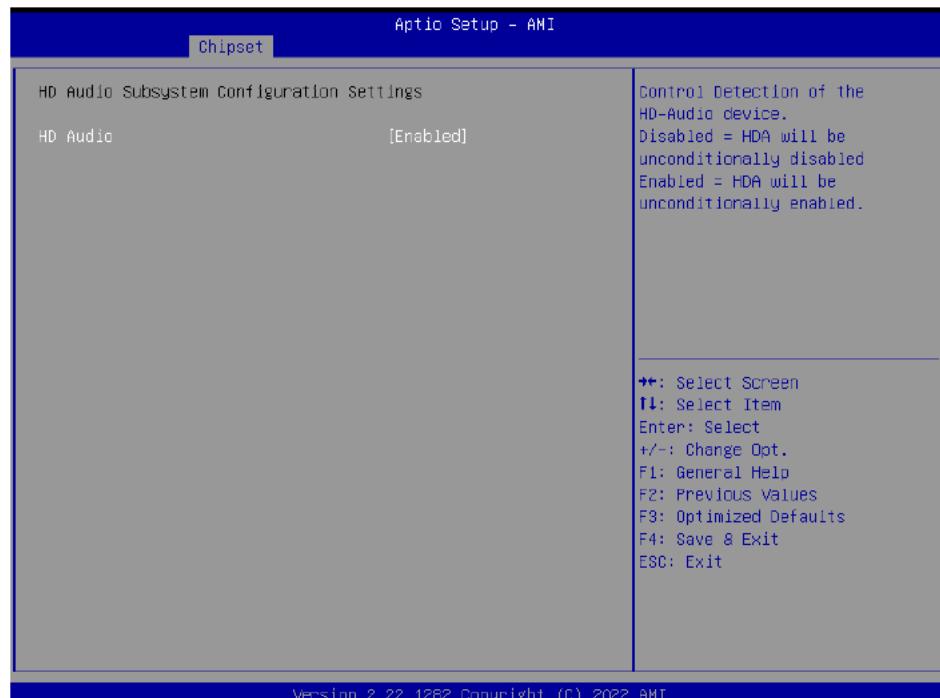

| Item | Option | Description |
|---|--|--|
| PCI Express Root Port 12(M.2 KeyB) | Enabled[Default], Disabled | Control the PCI Express Root Port. |
| ASPM | Disabled[Default], L0s L1 L0sL1 Auto | Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM. |
| L1 Substates | Disabled, L1.1 L1.1 & L1.2[Default] | PCI Express L1 Substates settings. |
| PCIe Speed | Auto[Default] Gen1 Gen2 Gen3 | Configure PCIe Speed. |

3.6.3.2.2 SATA And RST Configuration

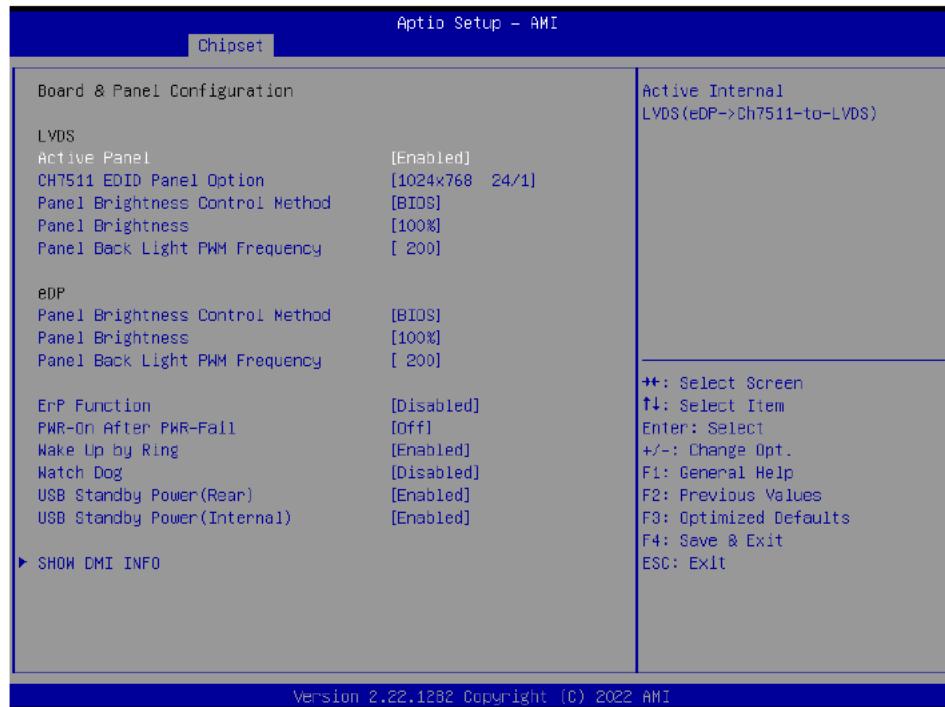

| Item | Options | Description |
|---------------------------|--------------------------------------|------------------------------|
| SATA Controller(s) | Enabled[Default] Disabled, | Enable/Disable SATA Device. |
| Port 0 | Enabled[Default] Disabled | Enable or Disable SATA Port. |
| Port 1 | Enabled[Default] Disabled | Enable or Disable SATA Port. |

3.6.3.2.3 HD Audio Configuration

| Item | Option | Description |
|-----------------|------------------------------|---|
| HD Audio | Disabled Enabled[Default] | Control Detection of the HD-Audio device. Disable = HDA will be unconditionally disabled Enabled = HDA will be unconditionally enabled. |

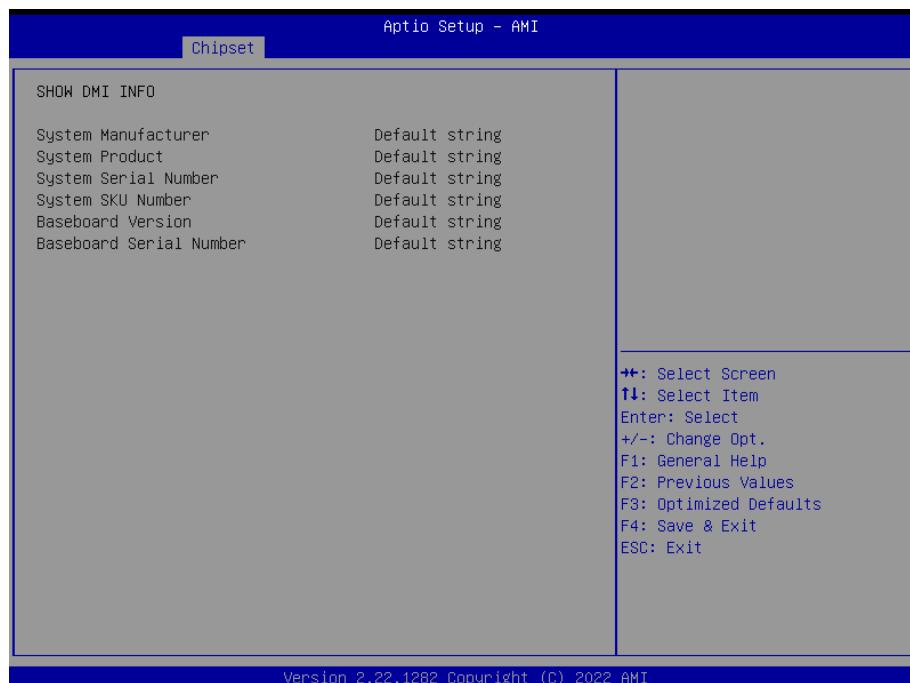

3.6.3.3 Board & Panel Configuration

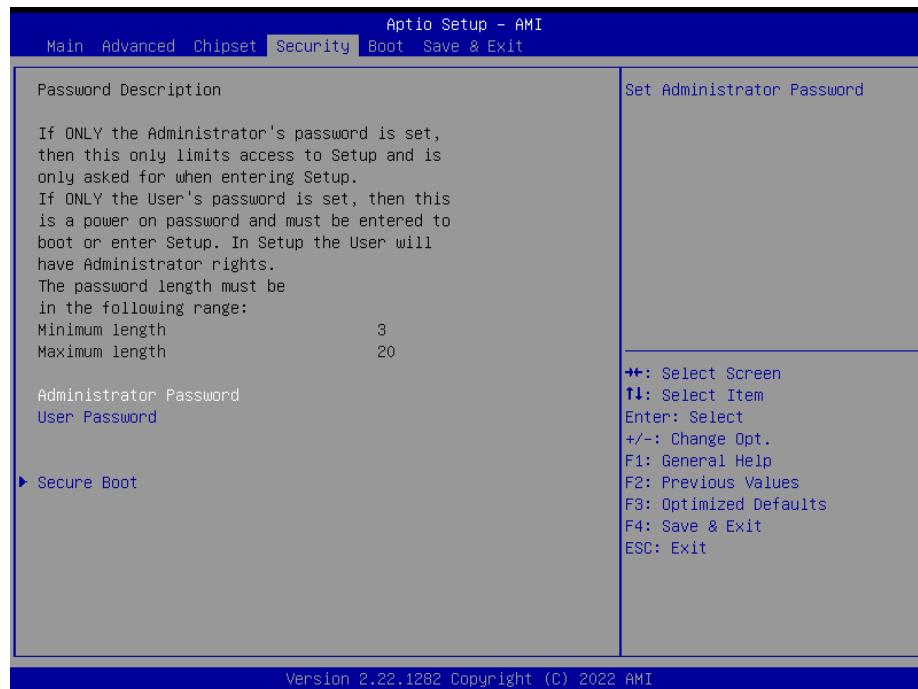

| Item | Option | Description |
|--|---|---|
| Active Panel | Disabled Enabled[Default] | Active Internal LVDS(eDP->Ch7511-to-LVDS). |

3.6.3.3.1 SHOW DMI INFO

3.6.4 Security

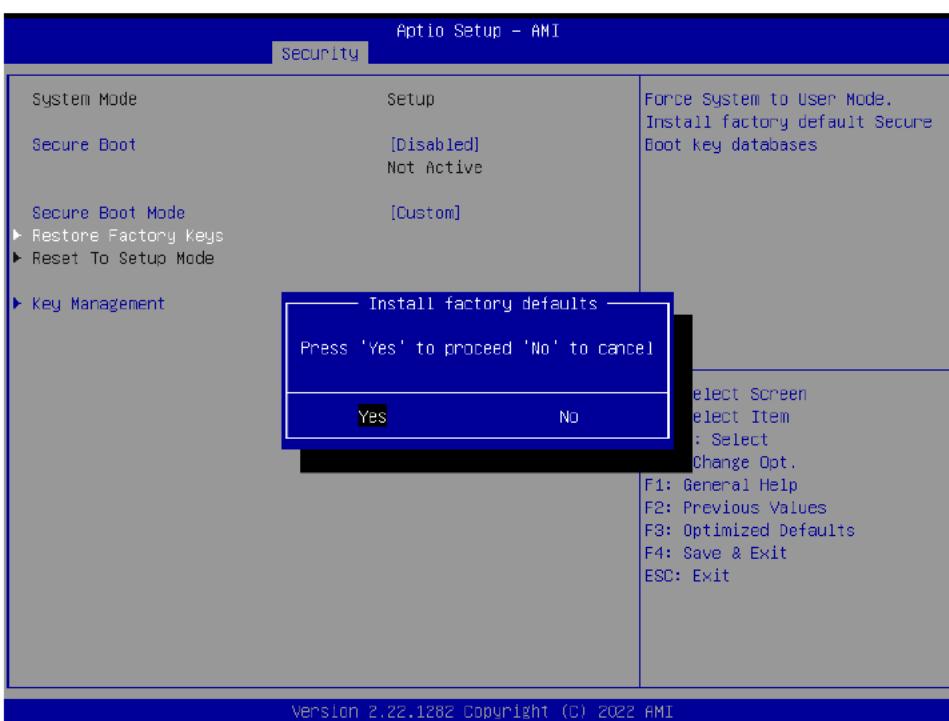

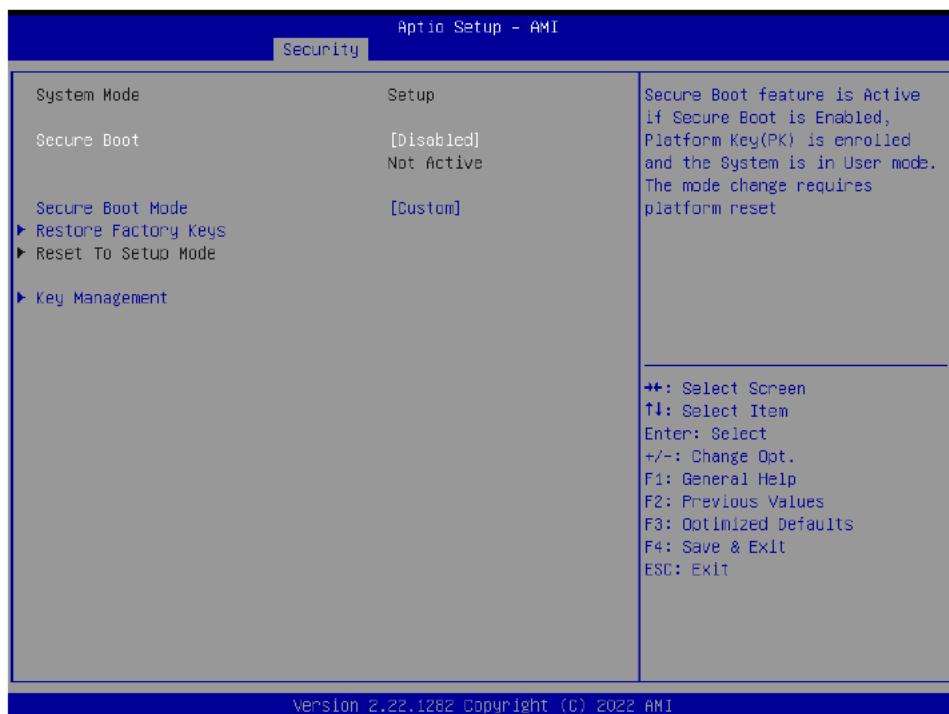

● Administrator Password

Set setup Administrator Password

● User Password

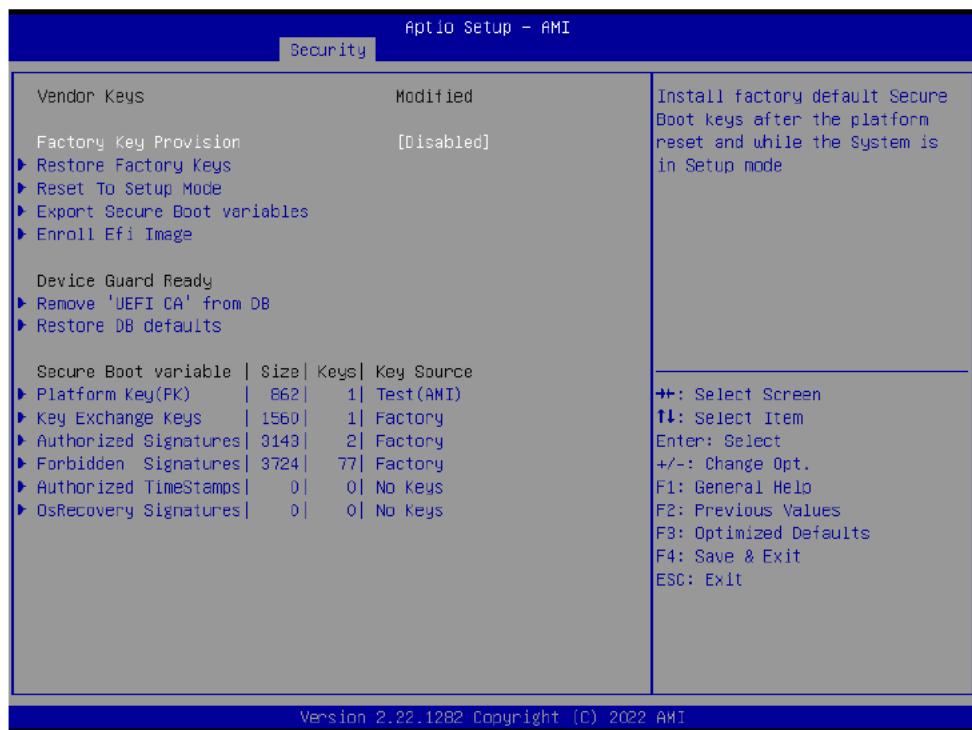

Set User Password

3.6.4.1 Secure Boot

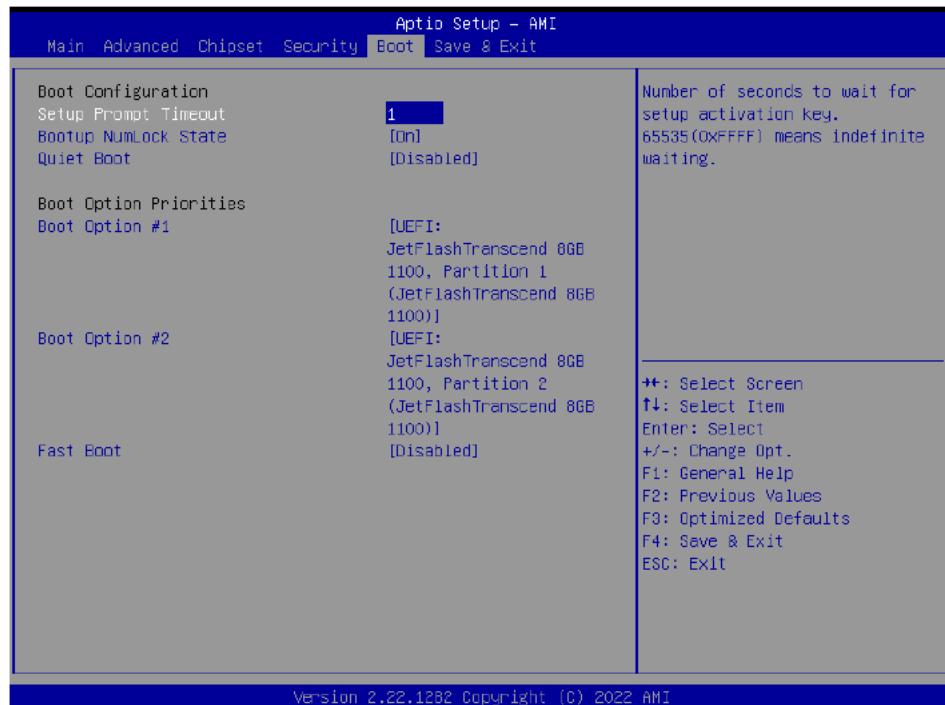

| Item | Option | Description |
|------------------|------------------------------|---|
| Secure Boot | Disabled[Default] Enabled | Secure Boot feature is Active if Secure Boot is Enable, Platform Key(PK) is enrolled and the System is in User mode. The mode change requires platform reset. |
| Secure Boot Mode | Standard Custom[Default] | Secure Boot mode selector: Standard/Custom. In Custom mode Secure Boot Variables can be configured without authentication. |

3.6.4.1.1 Key Management

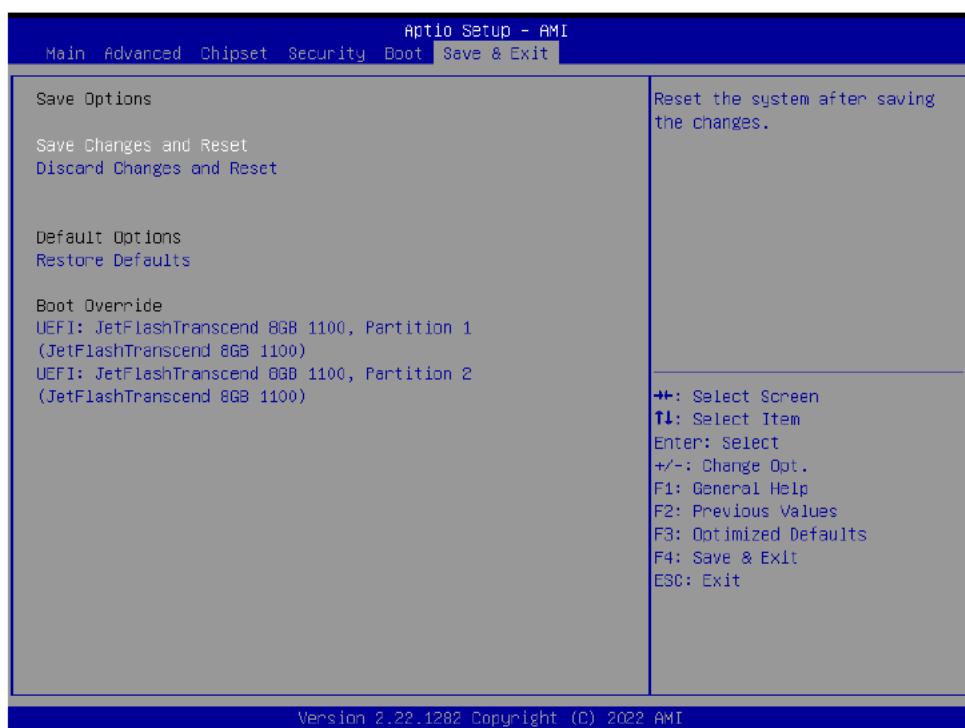

| Item | Option | Description |
|------------------------------|---------------------------------------|--|
| Factory Key Provision | Disabled[Default] Enabled | Install factory default Secure Boot keys after the platform reset and while the System is in Setup mode. |

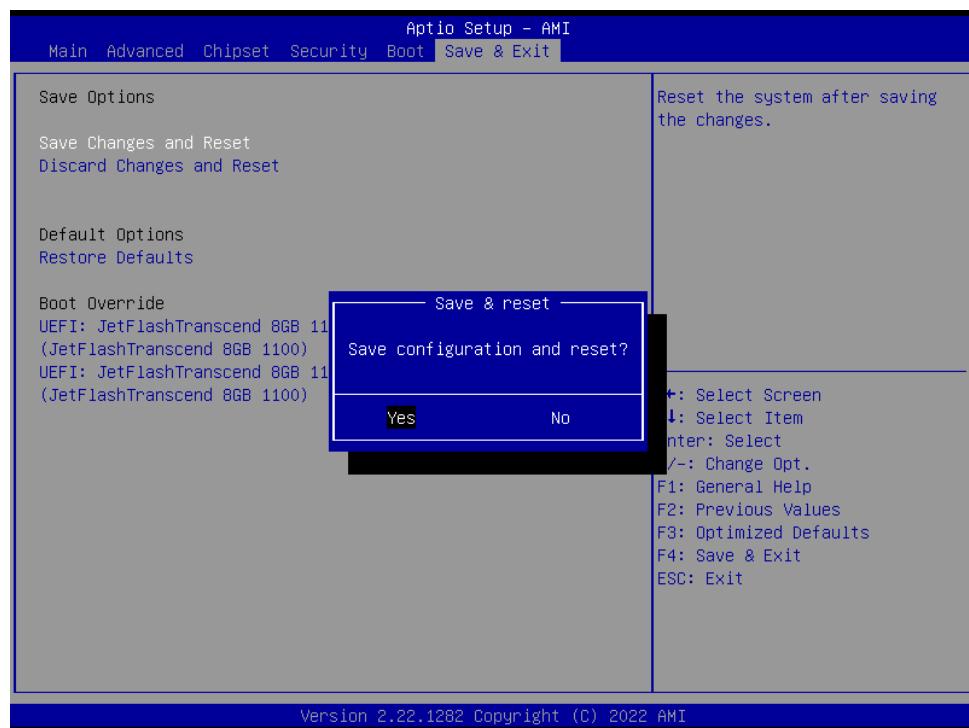

3.6.5 Boot

| Item | Option | Description |
|-----------------------------|------------------------------|---|
| Setup Prompt Timeout | 1~65535 | Number of seconds to wait for setup activation key. 65535(0xFFFF) means indefinite waiting. |
| Bootup NumLock State | On[Default] Off | Select the keyboard NumLock state |
| Quiet Boot | Disabled[Default] Enabled | Enables or disables Quiet Boot option |
| Fast Boot | Disabled[Default] Enabled | Enables or disables boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options. |
| Boot Option #1/2 | Set the system boot order. | |

3.6.6 Save and exit

3.6.6.1 ***Save Changes and Reset***

Reset the system after saving the changes.

3.6.6.2 ***Discard Changes and Reset***

Any changes made to BIOS settings during this session of the BIOS setup program are discarded. The setup program then exits and reboots the controller.

3.6.6.3 ***Restore Defaults***

This option restores all BIOS settings to the factory default. This option is useful if the controller exhibits unpredictable behavior due to an incorrect or inappropriate BIOS setting.

3.6.6.4 ***Launch EFI Shell from filesystem device***

Attempts to Launch EFI Shell application (Shellx64.efi) from one of the available filesystem devices.

4. Drivers Installation

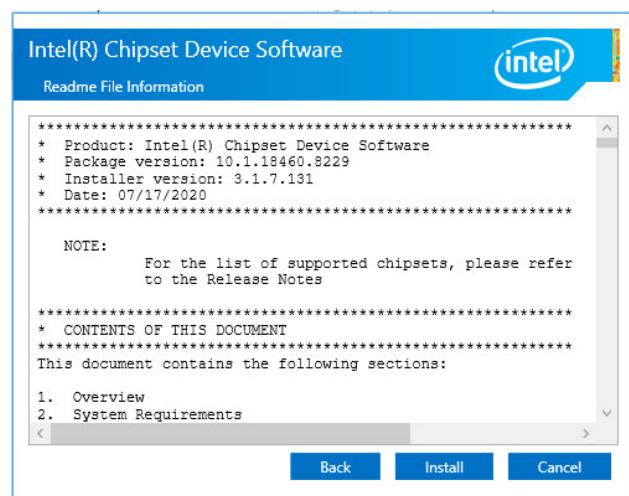

Note: Installation procedures and screen shots in this section are for your reference and may not be exactly the same as shown on your screen.

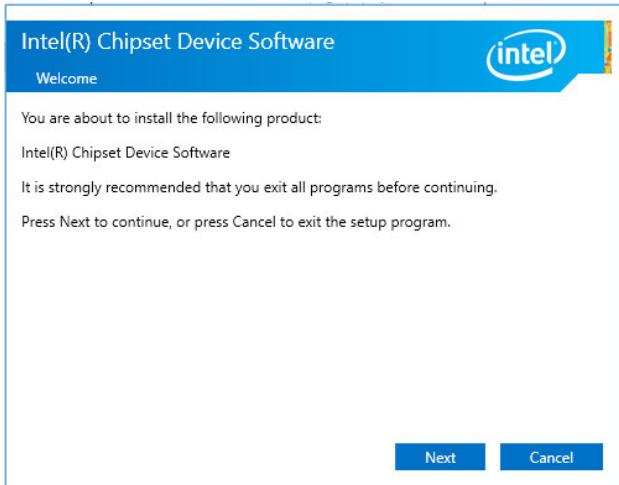

4.1 Install Chipset Driver

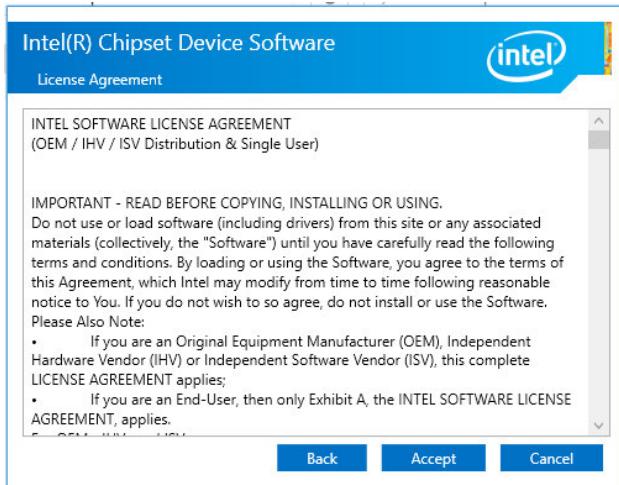

Note: The installation procedures and screen shots in this section are based on Windows 10 operation system. If the warning message appears while the installation process, click Continue to go on.

Step 3. Click Install.

Step1. Click Next.

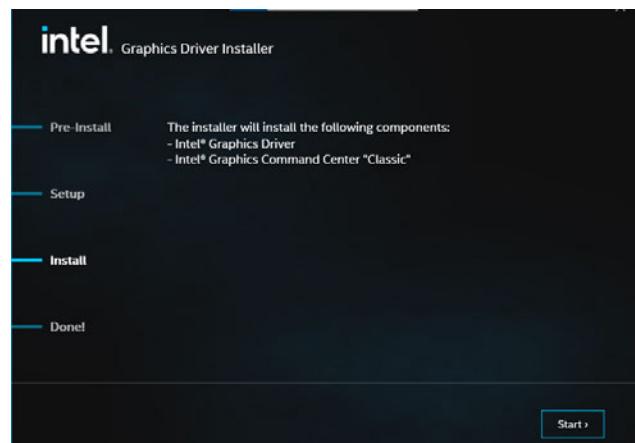

Step 2. Click Accept.

Step 4. Complete setup.

4.2 Install VGA Driver

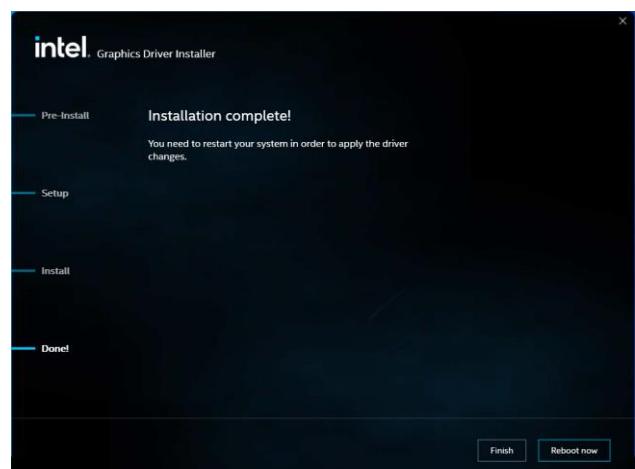

Note: The installation procedures and screen shots in this section are based on Windows 10 operation system. If the warning message appears while the installation process, click Continue to go on.

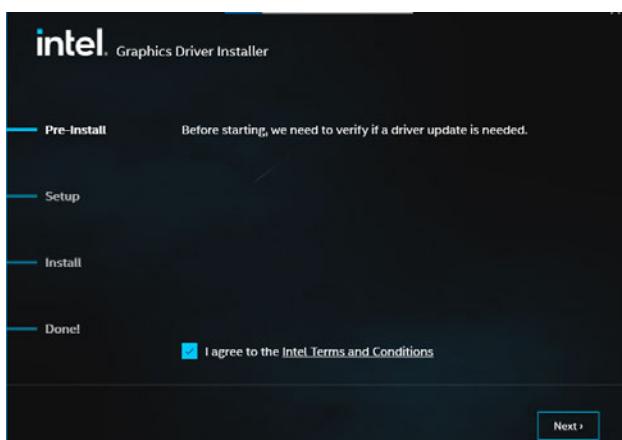

Step 3. Click Start.

Step 1. Click Begin installation.

Step 4. Click Reboot now.

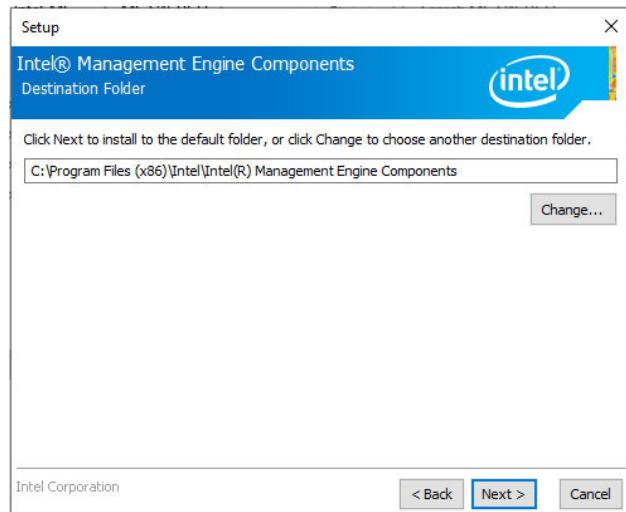

Step 2.

Click **Next** to accept license agreement.

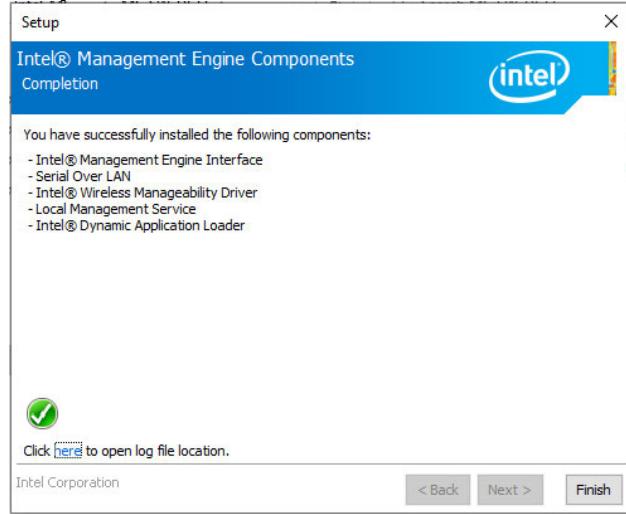

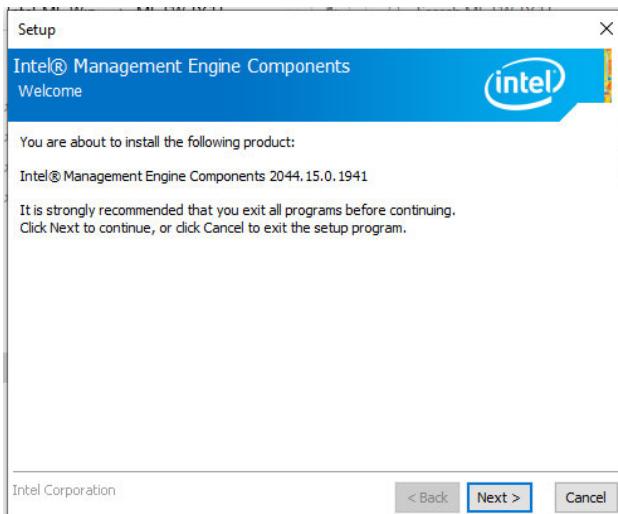

4.3 Install ME Driver

Note: The installation procedures and screen shots in this section are based on Windows 10 operation system. If the warning message appears while the installation process, click Continue to go on.

Step 3. Click Next.

Step 4. Click Finish to complete setup.

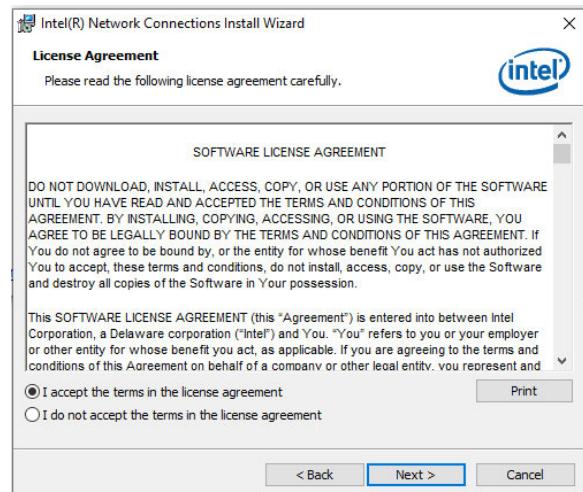

Step 2. Click Next.

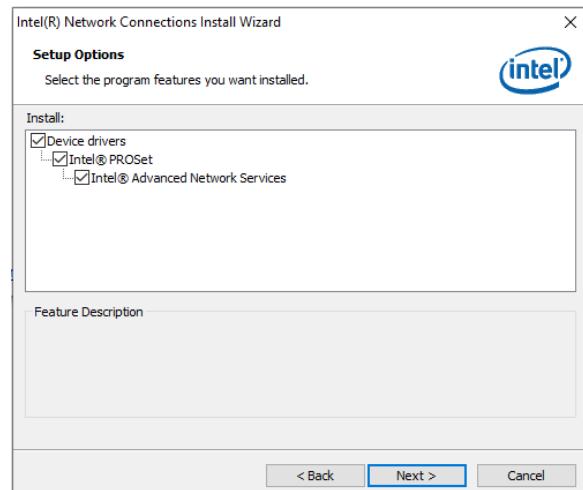

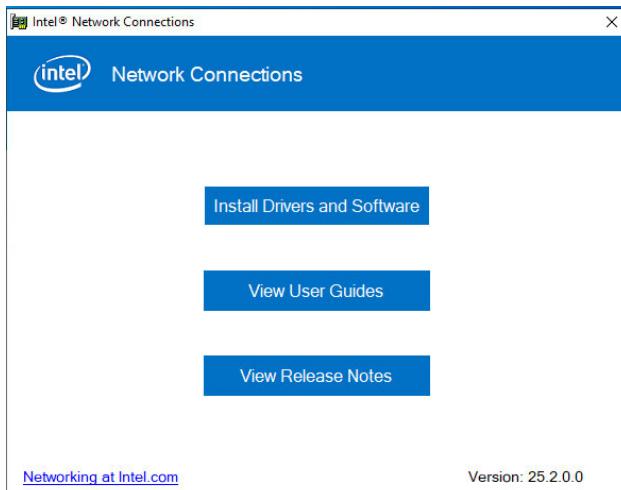

4.4 Install LAN Driver

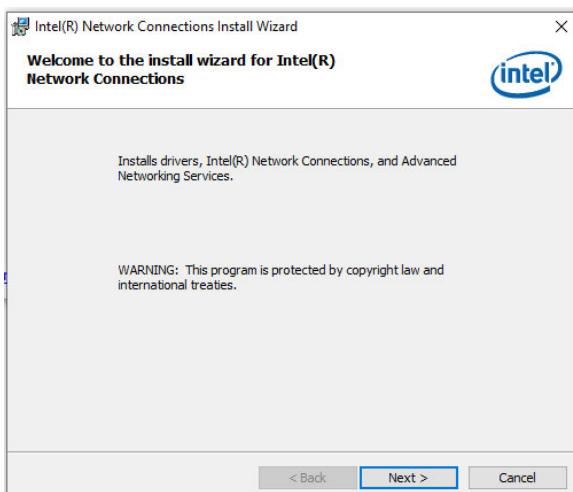

Note: The installation procedures and screen shots in this section are based on Windows 10 operation system. If the warning message appears while the installation process, click Continue to go on.

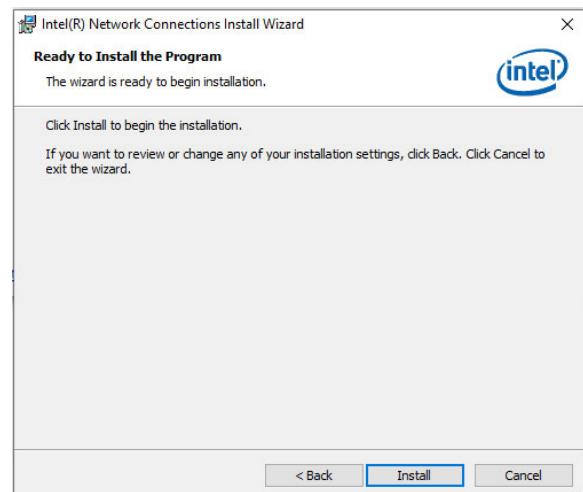

Step 3. Click Next.

Step 1. Click Next to continue installation.

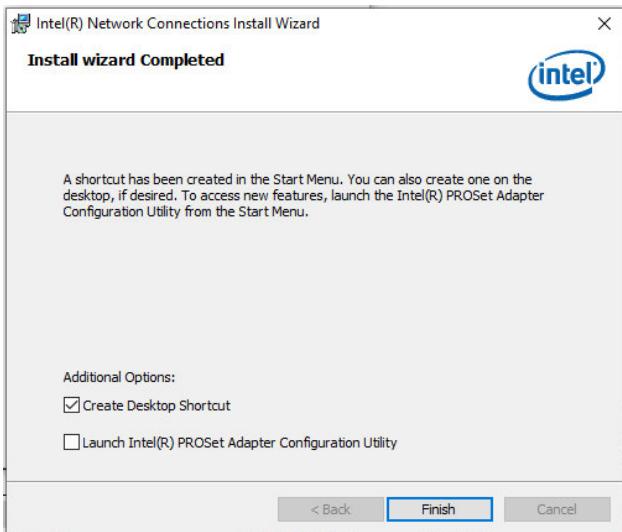

Step 4. Click Yes.

Step 2. Click Next.

Step 5. Click Install.

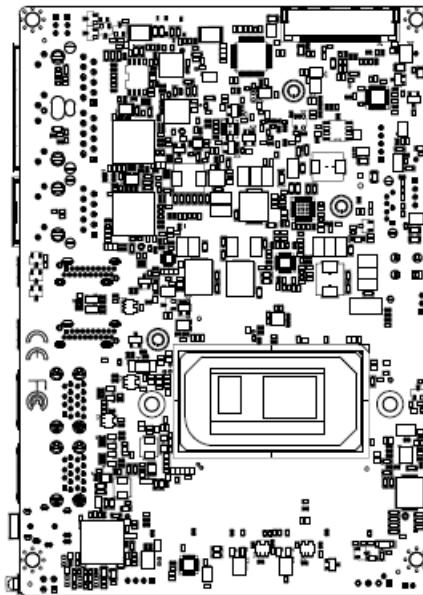

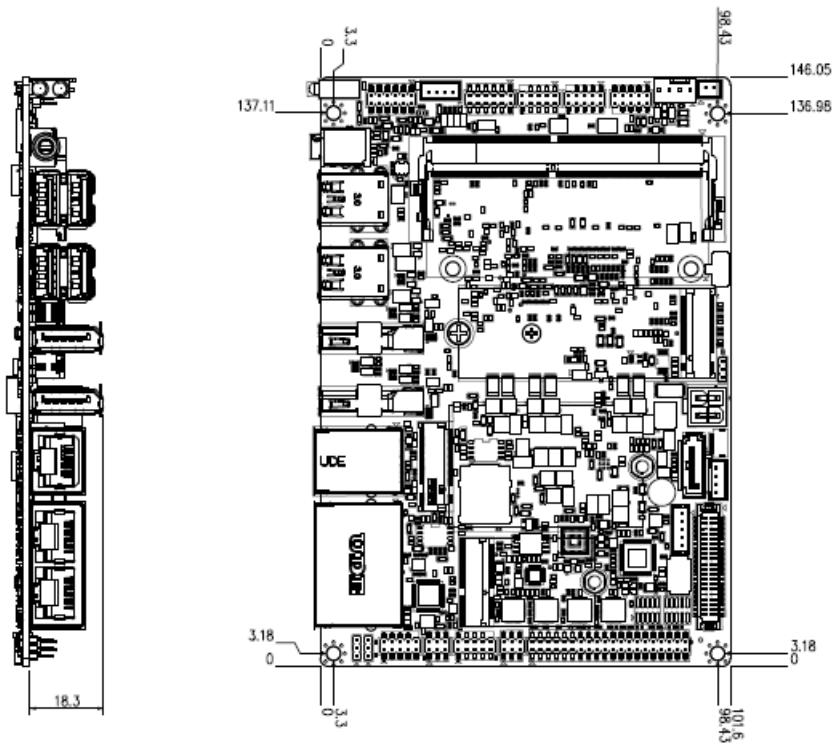

ECM-TGU User's Manual

Step 6. Click Finish to complete setup.

5. Mechanical Drawing

ECM-TGU User's Manual

Unit: mm

Thermal Solutions:

ECM-TGU standard package with heatsink (BIOS TDP: 15W), we also design cooler (BIOS TDP: 28W) solution for customer optional purchase.
