

MX6210N/MX6412J

Intel® Celeron N6210/J6412 SoC
Mini-ITX Motherboard

User's Manual

Edition 1.02 – December, 2021

FCC Statement

THIS DEVICE SUPPORTS PART 15 FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS:

(1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE.

(2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRE OPERATION.

THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS "A" DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES.

THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND, IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS.

OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE IN WHICH CASE THE USER WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT HIS OWN EXPENSE.

Notice

This guide is designed for experienced users to setup the system within the shortest time. For detailed information, please always refer to the electronic user's manual.

Copyright Notice

Disclaimer

BCM Advanced Research reserves the right to make changes, without notice, to any product, including circuits and/or software described or contained in this manual in order to improve design and/or performance. BCM Advanced Research assumes no responsibility or liability for the use of the described product(s), conveys no license or title under any patent, copyright, or masks work rights to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified. Applications that are described in this manual are for illustration purposes only. BCM Advanced Research makes no representation or warranty that such application will be suitable for the specified use without further testing or modification.

Life Support Policy

BCM Advanced Research PRODUCTS ARE NOT FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE PRIOR WRITTEN APPROVAL OF BCM Advanced Research.

As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into body, or (b) support or sustain life and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in significant injury to the user.
2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

Manual Objectives

This manual describes in detail the BCM MX6210N and MX6412J Main board.

We strongly recommend that you study this manual carefully before attempting to interface with this mainboard or change the standard configurations. Whilst all the necessary information is available in this manual we would recommend that unless you are confident, you contact your supplier for guidance.

Please be aware that it is possible to create configurations within the CMOS RAM that make booting impossible. If this should happen, clear the CMOS settings, (see the description of the Jumper Settings for details).

If you have any suggestions or find any errors concerning this manual and want to inform us of these, please contact our Customer Service department with the relevant details.

Safety Precautions

Warning!

Always completely disconnect the power cord from your chassis whenever you work with the hardware. Do not make connections while the power is on. Sensitive electronic components can be damaged by sudden power surges. Only experienced electronics personnel should open the PC chassis.

Caution!

Always ground yourself to remove any static charge before touching the mainboard. Modern electronic devices are very sensitive to static electric charges. As a safety precaution, use a grounding wrist strap at all times. Place all electronic components in a static-dissipative surface or static-shielded bag when they are not in the chassis.

Thin Mini-ITX Board Features

This chapter briefly describes the features of Thin Mini-ITX Board MX6210N and MX6412J. Below to summarize the major features of the Desktop Board.

Feature Summary

TABLE: MX6210N and MX6412J FEATURES

General SPEC	
Processor	Intel® Elkhart Lake N6210 Dual Core SoC MX6210N: PN# 71822
	Intel® Elkhart Lake J6412 Quad Core SoC MX6412J: PN# 71821
Memory	Two Horizontal 260-pin SoDIMM DDR4 Memory Slots; Supports up to 32GB
Integrated Graphics	Intel® Gen11LP Graphic
Display Interface	2 x HDMI Display Output supporting up to 4K@30Hz
	18/24 bits Dual Channel LVDS Through Parade PS8625 or Equivalent (Co-Lay eDP)
Storage	Onboard eMMC (Optional)
Super I/O	Nuvoton® NCT6126D or Equivalent
Type	eSPI Super I/O
COM Ports	2 x RS232/422/485 Port (with 5V/12V/RI)
	2 x RS232 Port (with 5V/12V/RI)
WatchDog Timer	1 Sec ~ 255 Sec
H/W Monitor	Yes
TPM	Infineon® SLB 9670VQ2.0 TPM 2.0/FW 7.85 or Equivalent
Type	TPM 2.0
USB 3.0 Hub	Genesys® GL3523 or Equivalent
Type	4 Ports USB 3.0 Hub
Ethernet 1	Intel® i225-LM (HSIO LANE #2)

Type	PCI Express Gigabit Ethernet
Ethernet 2	Intel® i225-LM (HSIO LANE #3)
Type	PCI Express Gigabit Ethernet
Ethernet 3	Intel® i211-AT (HSIO LANE #4)
Type	PCI Express Gigabit Ethernet
Ethernet 4	Intel® i211-AT (HSIO LANE #5)
Type	PCI Express Gigabit Ethernet
Audio	Realtek® ALC888S or ALC897 or Equivalent
Type	HD Audio Codec
Amplifier	2W Per Channel Stereo Amplifier
BIOS	*AMI® 256Mb SPI BIOS
Expansion Slots	
PCI-E	1 x 2230 M.2 E Key (with PCIe x1 & USB 2.0 Signal)
	1 x 2280 & 2242 M.2 M Key (with PCIe x2 & SATA III Signal)
Internal I/O Connectors	
COM	2 x RS-232/422/485 Header (2x5 2.0mm Header)
	2 x RS-232 Header (2x5 2.0mm Header)
I ² C	1 x I ² C Header (2x4 2.0mm Header) Signal level: 1.8V x1, 3.3V x1 DC output: 3.3V
I ² S	1 x I ² S Header (1x6 2.0mm Header) Signal level: 1.8V DC output: 3.3V
USB	2 x USB 2.0 header (4 x USB 2.0 Ports)
	1 x Dual Mode USB 3.0 Vertical Type A Connector (Host & Device)
LVDS/eDP	1 x LVDS/eDP Header LVDS: HIROSE #DF13-40DP-1.25V eDP: ACES 50203-4001-001 (optional)
Backlight	1 x Backlight Header (1x5 2.0mm Header)
Fan	1 x 4 Pin CPU Fan Header
	1 x 4 Pin System Fan Header
GPIO	1 x 8 bits GPIO Headers (4 In/4 Out) (2x5 2.0mm Header) Signal level: 3.3V

	DC output: 5V
SPI	1 x SPI Header (2x4 2.0mm Header)
eSPI	1 x eSPI Header (2x5 2.0mm Header)
SATA	1 x SATA III Connectors (Red)
SATA Power	1 x 15 pin SATA Power Connector
Front Audio	1 x Front Audio Header (2x5 2.54mm Pitch)
Front Panel	1 x Front Panel Header (2x5 2.54mm Pitch)
Amp	1 x Amplifier Locking Type Header (1x4 2.00mm Pitch)
Buzzer	1 x Onboard Buzzer
CMOS Battery	1 x Horizontal Socket Type Battery
DC-In	1 x Mini-Fit Jr 4 Pin DC-In Connector
Back I/O Panel	
HDMI	2 x HDMI Connectors
LAN	2 x RJ45 Connectors
	2 x RJ45 Connectors
USB	4 x USB 3.0 Connectors
Audio	1 x MIC/Line-Out combo Jack
DC-In	1 x Barrel Type DC-In Connector (ID 2.5mm/OD 5.5mm)
Power & Connector	12V – 24V Wide Range DC-In
Form Factor	Mini-ITX 6.7 x 6.7 inches
Cooling	Passive Heatsink
Layer	8 Layer Board
Color	BCM Standard Blue
Regulatory Compliance	FCC Class B/CE/UL/CB
	RoHS and REACH Compliant
	Conflict Minerals Survey
Support OS	Microsoft Windows 10 64-bit (Win10 IoT Enterprise 2019 LTSC and Win 10 Pro 20H2)
	*Linux Ubuntu 20.04
Operation Environment	
Temperature	0 C to 60 C
Humidity	5% to 85% non-condensing
Storage Environment	

Temperature	-10 C to 60 C
Humidity	5% to 85% non-condensing
Accessories	
SATA Signal	1 x SATA Signal Cable
SATA Power	1 x SATA Power Cable
I/O Shield	1 x Full Size I/O Shield
	1 x Half Size I/O Shield
Packaging	Mini-ITX Bulk Pack

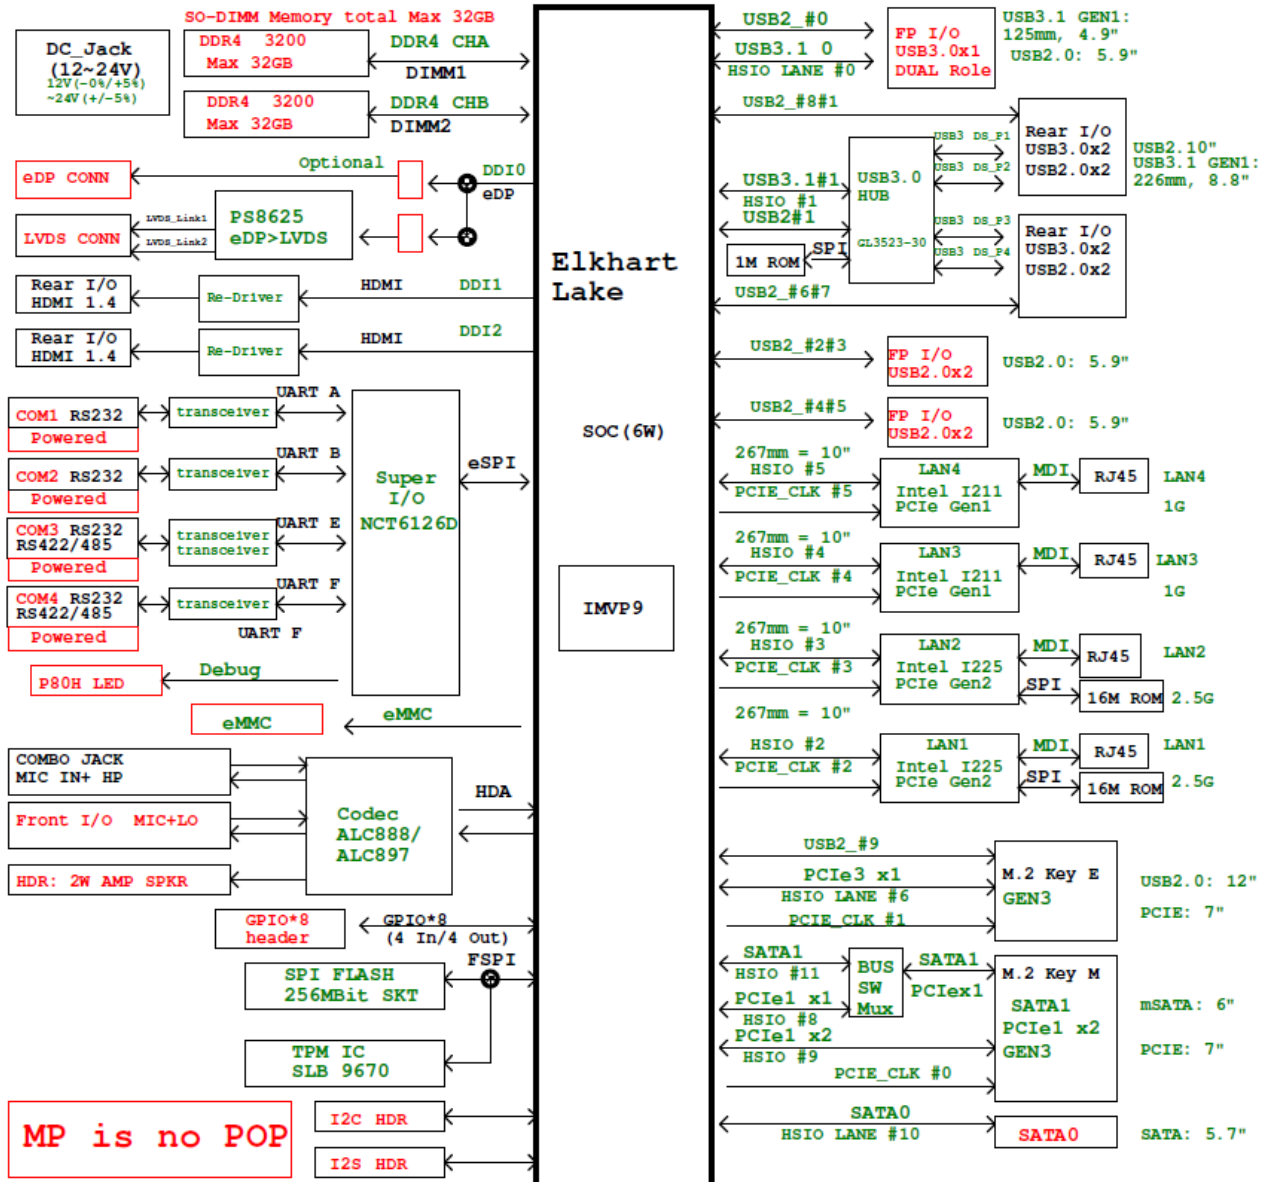

**Notes 1: It's a normal behavior that POST will be stayed at "A2" for about 50s.*

**Notes 2: Linux kernel 5.11 has hang code issue during reboot and power off.*

■ S/N# Label

Rule for Serial number:

BCM SN# 705010646100001

SN# is in 15 alphanumeric barcode format on a label. Defined as:

First 5 digits = Part Number (70501),

6th and 7th digits = Year (06),

8th and 9th digits = Week (46 = 46th week of that year),

10th = BCM internal control code, contact Wing for details.

11th - 15th digits = Serial Number (start with 00001).

DIMM placement: DIMM1 (Up) /DIMM2 (Down)

- Channel Max Capacity (GB): 32GB
- System Max Capacity (GB): 32GB

2.3 Onboard Graphics

Board must support all integrated graphics features supported by the processor through the PCH (including but not limited to DirectX, HD/Blu-ray video hardware decoding, PAVP-Lite and HDCP).

Support 3 Display pipes, simultaneous multi-streaming on all three display pipes (1x Internal and 2x External Displays)

Supports Intel® Display Power Saving Technology (DPST) 6.3, Panel Self Refresh (PSR) and Display Refresh Rate Switching Technology (DRRS)

1. HDMI 1.4b x 2ea
2. LVDS x1 / eDP 1.3 internal connector (optional)

HDMI feature: High-Definition Multimedia Interface (HDMI*)

- HD – HDMI1.4 flush mount graphics connector: back panel video
 - Data Rate: 5.4 GT/s
 - HDCP 2.3 Yes
 - HD Audio Yes
 - Compressed Audio Yes
 - DSC (Display Stream Compression): No
-
- The High-Definition Multimedia Interface (HDMI*) is provided for transmitting uncompressed digital audio and video signals from DVD players, set-top boxes, and other audio-visual sources to television sets, projectors, and other video displays. It can carry high-quality multi-channel audio data and all standard and high-definition consumer electronics video formats. The HDMI display interface connecting the processor and display devices uses transition minimized differential signaling (TMDS) to carry audiovisual information through the same HDMI cable.
 - HDMI includes three separate communications channels: TMDS, DDC, and the optional CEC (consumer electronics control). CEC is not supported on the processor. As shown in the following figure, the HDMI cable carries four differential pairs that make up the TMDS data and clock channels. These channels are used to carry video, audio, and auxiliary data. In addition, HDMI carries a VESA DDC. The DDC is used by an HDMI Source to determine the capabilities and characteristics of the Sink.
 - Audio, video, and auxiliary (control/status) data is transmitted across the three TMDS data channels. The video pixel clock is transmitted on the TMDS clock channel and is used by the receiver for data recovery on the three data channels. The digital display data signals driven natively through the PCH are AC coupled and needs level shifting to convert the AC coupled signals to the HDMI compliant digital signals.
 - Maximum Resolution 3840× 2160@30 Hz (4K@30 Hz); Data Rate 2.9 GT/s

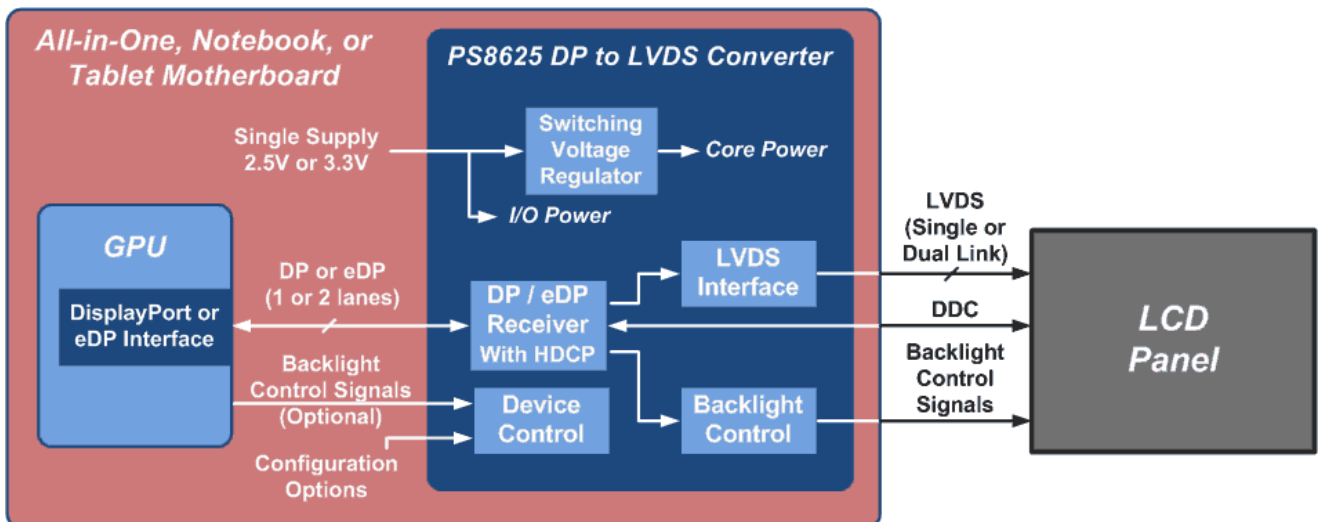

- Supports Audio on HDMI

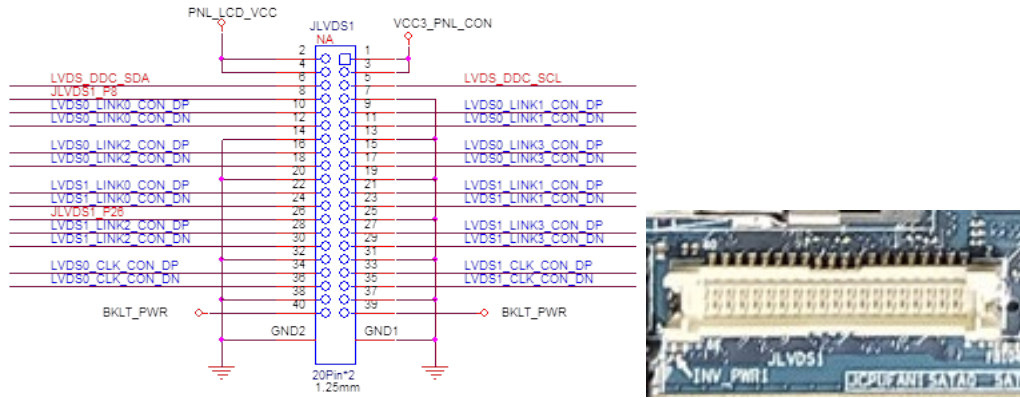

LVDS feature:

eDP to LVDS bridge IC: [Parade PS8625QFN56GTR](#)

- Enables the use of LVDS display panels with DisplayPort™ or eDP™ video Source devices
- Single link or dual link LVDS output, clock speed up to 135MHz
- Supports up to 1920×1200@60Hz at 18 or 24 bit color depth

Add GP_D19_TGPIO43_LVDS_CBL_L_DET_N to support LVDS cable detection from Pin 8 & Pin 26

2.4.6 SATA Power – 15pin Standard

Board must provide internal SATA power connector in order to power internal SATA devices. SATA power connector must be vertically oriented 15-pin male colored black, compatible with standard SATA 15-pin female power cable connectivity solutions.

Board must support SATA power with at least 1.0A from 12V rail, 2.5A from 5V rail and 0.5A from 3.3V rail, which must be provided from the board's DC-to-DC circuit and accounted for in the board's total power budget.

Below is example for cable drawing

SATA Power Cable Specification

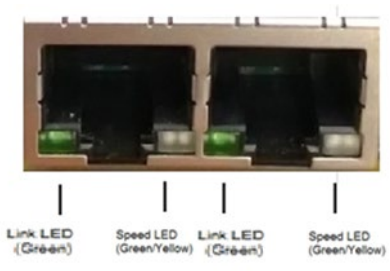

Note: L-shaped connector must be oriented so that cables run above the board when attached to the SATA power header.

Pin	Name	Color	Description
1	+3.3VDC	Orange	+3.3 VDC
2	+3.3VDC	Orange	+3.3 VDC
3	+3.3VDC/ DevSleep	NC	NC
4	COM	Black	Ground
5	COM	Black	Ground
6	COM	Black	Ground

12	COM	Black	Ground
13	+12VDC	Yellow	+12 VDC
14	+12VDC	Yellow	+12 VDC
15	+12VDC	Yellow	+12 VDC

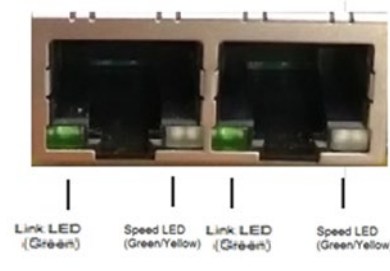

2.4.7 i211 and i215LM LAN Indicator

Onboard i225 RJ45 connectors must have integrated magnetics and support dual status LEDs per port, as below data

Diagram	LED	Color	State	Condition
	Link	NA	off	LAN link is not established

				or LAN disable
	Link	Green	on	LAN link is established or LAN port disable
	Link	Green	blinking	LAN activity occurring
	Speed	NA	off	10/100 M b/s data rate or LAN disable
	Speed	Green	on	2500 M b/s data rate
	Speed	Orange	on	1000 M b/s data rate or LAN port disable

Onboard I211/I210 RJ45 connectors must have integrated magnetics and support dual status LEDs per port, as Below

Diagram	LED	Color	State	Condition
	Link	NA	off	LAN link is not established or LAN disable
	Link	Green	on	LAN link is established or LAN port disable
	Link	Green	blinking	LAN activity occurring
	Speed	NA	off	10 M b/s data rate or LAN disable
	Speed	Green	on	100 M b/s data rate
	Speed	Orange	on	1000 M b/s data rate or LAN port disable

2.4.8 Audio Combo Jack

Codec driver cannot support Headset type auto detection from iPhone-type and Nokia-type parts

Here is jumper setting guide to support iPhone-type or Nokia-type parts

		JMIC1 Jumper setting	
iPhone-type headset CITA	CITA	(1-2) (3-4)	Default BOM
Nokia-type headset CMTP	CMTP	(1-3) (2-4)	

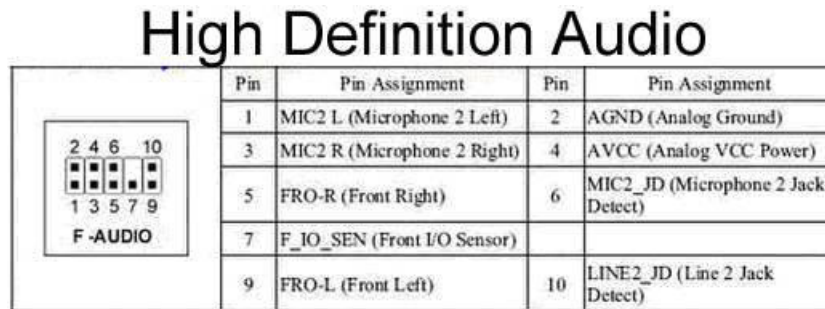

[TP Headset Connector Pinout](#) from web data
